寒热病第二十一

【原文】

21.1 皮寒热者，不可附席，毛发焦，鼻槁腊不得汗。取三阳之络，以补手太阴。

21.2 肌寒热者，肌痛，毛发焦而唇槁腊，不得汗。取三阳于下以去其血者，补足太阴以出其汗。

21.3 骨寒热者，病无所安，汗注不休。齿未槁，取其少阴于阴股之络；齿已槁，死不治。骨厥亦然。

21.4 骨痹，举节不用而痛，汗注烦心。取三阴之经，补之。

21.5 身有所伤血出多，及中风寒，若有所堕坠，四肢懈惰不收，

【今译】

21.1 体表寒热，疼痛不可着席，毛发枯燥，鼻孔干燥，汗液不得出者，治疗时应取足太阳经的络穴，补手太阴经的腧穴。

21.2 肌寒热，肌痛，毛发焦枯，口唇干燥，汗不得出者，应取足太阳经下部腧穴以散瘀血，再补足太阴经以出其汗。

21.3 骨骼寒热，烦躁不安，大汗淋漓者，若牙齿未现枯槁现象，当取足少阴络穴大钟针治，如牙齿已现枯槁之象，便是不治之症。骨厥病的诊治，也是这样。

21.4 骨痹，骨节不用而疼痛，汗出如注，心中烦乱，治疗时可取三阴经穴位，针刺用补法。

21.5 身体有所伤，血流甚多，且又感受了风寒，或从高处跌落，

Chapter 21

Hanre Bing: Cold and Heat Diseases

21.1 Cold and heat [disease due to invasion of pathogenic factors into] the skin, [characterized by] inability to touch the mat [because of pain in the skin], brittle hair, dry nose and no perspiration, can be treated by needling the Collateral [Acupoint] of Triple Yang^[1] and puncturing [the Spleen Channel of] Foot-Taiyin^[2].

21.2 Cold and heat [disease due to invasion of pathogenic factors in] the muscles, [characterized by] pain in the muscles, scorching hair, dry lips and no perspiration, [can be treated by] needling [the Acupoint located] on the lower part of Triple Yang^[3] to remove stagnant blood and puncturing [the Spleen Channel of] Foot-Taiyin to induce sweating.

21.3 Cold and heat [disease due to invasion of pathogenic factors into] the bones, [characterized by] restlessness, profuse sweating and no signs of dry teeth, [can be treated by] needling the Collateral [Acupoint] of [the Kidney Channel of Foot-] Shaoyin located lateral to the thigh^[4]. [If] the teeth are already dry, it is incurable. Gujue^[5] can be treated according to the treatment of cold and heat diseases.

21.4 Gubi[, characterized by] inflexibility and pain of all joints, profuse sweating and dysphoria [, can be treated by] needling [the Acupoints located on] the three Yin Channels with reinforcing [techniques].

21.5 [The disease marked by] trauma with serious hemor-

以致四肢懈怠无力者，叫做“体惰”，治疗时可取小腹脐下的三结交。三结交指胃经、脾经及任脉三经相交处的关元穴。

21.6 厥痹，是厥逆之气上及腹部，治疗时可取阴经或阳经的络穴，根据主病之所在，在阳经用泻法，在阴经用补法。

21.7 颈侧的动脉是人迎穴，人迎位于足阳明胃经，在婴筋之前。婴筋之后是手阳明经的腧穴，名叫扶突。其后是足少阳经的天牖穴。天牖之后是足太阳经的天柱穴。腋下三寸处的动脉，是手太阴经的腧穴，名叫天府。

21.8 阳邪上逆而引起的头痛，胸满，呼吸不利，当取人迎穴治

rhage, complicated by attack of wind and cold, or falling from a high place that causes lassitude of the limbs, is called Tiduo (sluggishness of the body) [which can be treated by] needling the Triple Convergence below the navel and the lower abdomen. The so-called Triple Convergence refers to Guanyuan (CV 4) [located on the point where the Stomach Channel of Foot-] Yangming, [the Spleen Channel of Foot-] Taiyin [and the Renmai (Conception Vessel) converge] three Cun below the navel.

21.6 Juebi (Bi-Syndrome due to adverse flow of Qi) [is caused by] Qi flowing adversely upward [along the lower limb] into the abdomen. [It can be treated by] needling the Collateral [Acupoints of the concerned] Yin and Yang [Channels]. [Before selecting Acupoints, cares must be taken] to make sure [whether] the disease [is of Yin nature or of Yang nature] . The Yang [Channels should be needled with] reducing [techniques] while the Yin [Channels should be needled with] reinforcing [techniques].

21.7 The pulsation of the artery lateral to the neck is called Renying (ST 9) [which is located on the Stomach Channel of] Foot-Yangming and anterior to the cervical tendon. Posterior to the cervical tendon is Futu (LI 18), [an Acupoint located on the Large Intestine Channel of] Hand-Yangming. Below it is Tianyou (TE 16), [an Acupoint located on the Sanjiao (Triple Energizer) Channel of] Foot-Shaoyang^[6]. Below it is Tianzhu (BL 10), [an Acupoint located on the Bladder Channel of] Foot-Taiyang. [The pulsation of] the artery three Cun below the armpit is Tianfu (LU 3), [an Acupoint located on the Lung Channel of] Arm-Taiyin^[7].

之。突然失音，喉舌强硬者，当刺扶突穴，并刺舌根出血。突然耳聋，经气蒙蔽，耳失聪、目不明者，治疗时取天牖穴。突发拘挛、痲痛、眩晕、两足无力支撑身体，治疗时取天柱穴。突然患热病使气机上逆，肝肺二经内蕴火邪相搏，致血逆妄行，鼻口出血，治疗时取天府穴。以上五穴称为天牖五部。

21.9 手阳明大肠经入于颊部而遍络于齿的，名叫大迎，所以下齿齩痛应取大迎穴。臂恶寒的用补法，不恶寒的用泻法。足太阳膀胱经入于颊部而遍络于齿的，名叫角孙，所以治疗上齿齩痛应取角孙穴及鼻和颧骨前面的穴位。刚发病时如果脉气充盛，就用泻法，反之则

symptoms of] chest fullness and inability to breathe [can be treated by] needling Renying (ST 9) . Sudden loss of voice and stiffness of the tongue [can be treated by] needling Futu (LI 18) and pricking the root of tongue to let out blood. Sudden deafness, obstruction of Qi and blurred vision [can be treated by] needling Tianyou (TE 16) . Sudden spasm, epilepsy, dizziness and flaccidity of feet [can be treated by] needling Tianzhu (BL 10) . Sudden occurrence of heat disease, which leads to adverse flow of Qi, overflowing of blood, bleeding in the mouth and nose due to struggle [of pathogenic fire in the Channels of] the liver and the lung, [can be treated by] needling Tianfu (LU 3). [Among these five Acupoints, Tianyou (TE 16) is located in the middle region and the other four Acupoints are located on the four limbs], that is why [the arrangement of these five Acupoints] is called Tianyou (TE 16) and Five Regions.

21.9 [The Large Intestine Channel of] Arm-Yangming[8] enters the cheekbone and connects with the teeth. [An Acupoint] called Daying (ST 5) [located on it can be] needled to treat dental caries of the lower teeth. [If] there is aversion to cold in the arm, [it can be treated by] needling with reinforcing [techniques]; [if] there is no aversion to cold in the arm, [it can be treated by] needling with reducing [techniques]. [The Bladder Channel of] Foot-Taiyang enters the cheekbone and connects with the teeth. [An Acupoint] called Jiaosun (TE 20) [is located on it]. [To treat] dental caries of the upper teeth, [the Acupoints located] anterior to the nose and cheekbone can be needled. When the disease has just occurred, the Channel is full and [should be needled with] reducing [techniques]. [If the Chan-

21.10 足阳明胃经有挟于鼻旁而入于面部的，名叫悬颅，其经脉下行属于口，上行的由口入系于目本。治疗时泻其有余，补其不足，反之则会加重病情。足太阳膀胱经过项入于脑部，直接连属于目本的叫做眼系。若头目疼痛，可在项中两筋间取穴。此脉入脑后，分别联属于阴跷、阳跷二脉，阴阳相交，阳入里，阴出外，交会于目锐眦。如果阳气偏盛，则两目张开；如果阴气偏盛，则两目闭合。

21.11 热厥证，取足太阴脾经、足少阳胆经进行治疗，均须留

nel] is deficient, [it should be needled with] reinforcing [techniques]. Another statement is that [the Acupoints located] lateral to the nose should be needled.

21. 10 [The Stomach Channel of] Foot-Yangming runs beside the nose and enters the face, [crossing the Bladder Channel of Foot-Taiyang on the Acupoint] called Xuanlu (GB 5) . [The Channel descends] to link with the mouth. [The part running in the upper] enters the eye. The diseases related to the regions [through which this Channel runs can be treated by] needling [the Acupoints located on this Channel with the techniques of] reducing Shi (Excess) and reinforcing Xu (Deficiency) . Contrary treatment will worsen the disease. [The Bladder Channel of] Foot-Taiyang runs along the neck into the brain and directly connects with the eye, known as the Eye System. Headache and pain of the eye [can be treated by] needling [the Acupoint located] between two tendons [on the neck] . [This Channel] enters the brain [from the neck to connect with] the Yinqiao (Yin Heel-Channel) and Yangqiao (Yang Heel-Channel). [These two Channels of] Yin and Yang converge with each other. [As a result,] Yangqi enters the Yin [Channel] and Yinqi enters the Yang [Channel] . [The Yin Channel and the Yang Channel] converge at the inner canthus. [When] Yangqi is superabundant, the eyes constantly open wide; [when] Yinqi is superabundant, the eyes always keep closed.

21. 11 Rejue^[8] [can be treated by] needling [the Acupoints located on the Spleen Channel of] Foot-Taiyin and [the Bladder Channel of] Foot-Shaoyang. [All the needles should be] retained [for a longer period of time] . Hanjue^[9] [can be treated by]

针。寒厥证，取足阳明胃经、足少阴肾经进行治疗，均须留针。舌纵流涎，胸中烦闷者，当取足少阴经足部的膂穴进行治疗。恶寒战栗，两颌鼓动，汗不得出，腹胀烦闷，当取手太阴肺经穴治疗。针刺正气虚的病证，应顺着脉气的去向施以补法；针刺邪气实的病证，应迎着脉气的来向施以泻法。

21.12 春季多取络脉间穴位，夏季多取分肉腠理间穴位，秋季多取气口部位的穴位，冬季多取经脉部位的穴位。凡此四时用针，应与时令相适应。取络脉穴可治皮肤之病，取肌肤间穴可治肌肉之病，取气口穴可治筋脉之病，取各经脉之穴则可治骨髓和五脏诸病。

21.13 身体有五个重要部位：一是伏兔，二是小腿，三是背

Protrusion of the tongue, drooling and dysphoria [can be treated by] needling [the Acupoints located on the Kidney Channel of] Foot-Shaoyin. Chills, bulged cheeks [due to cold], no perspiration, abdominal distension and dysphoria [can be treated by] needling [the Acupoints located on the Lung Channel of] Hand-Taiyin. [To treat] Xu (Deficiency) [Syndrome, the needles should be] inserted [in the direction along which the Channel-Qi] recedes; [to treat] Shi (Excess) [Syndrome, the needles should be] inserted [in the direction along which the Channel-Qi] comes.

21. 12 In spring, [the Acupoints located on] the Collaterals should be needled; in summer, [the Acupoints located on] the muscular interstices should be needled; in autumn, [the Acupoints located on] the Qikou (wrist) should be needled; in winter, [the Acupoints located on] the Channels should be needled. So needling should be done according to the climatic changes in the four seasons. [The Acupoints located on] the Collaterals [can be needled] to treat skin [diseases]; [the Acupoints located on] the muscular interstices [can be needled] to treat muscle [diseases]; [the Acupoints located on] the Qikou (wrist) [can be needled] to treat tendon [diseases]; [the Acupoints located on] the Channels [can be needled] to treat [diseases of] the bone marrow and the Five Zang-Organs.

部，四是五脏腧穴，五是项部。此五部患痈疽的，为不治之症。疾病始于手臂的，可先取手阳明大肠经、手太阴肺经的穴位，使其出汗；疾病始于头部的，可先取项部足太阳膀胱经的穴位，使其出汗；疾病开始于足胫部的，可先取足阳明胃经的穴位，使其出汗。针刺手太阴经的诸穴可以出汗，针刺足阳明经诸穴也可以出汗。针刺阴经而出汗过多的，可取阳经穴止汗；针刺阳经而出汗过多的，可取阴经穴止汗。

21.14 错误用针造成的危害有：已刺中病邪而留针不去，使人精气耗泄；尚未刺中病邪即出针，使邪气凝聚不散。精气耗泄会使病情加重而身体羸弱，邪气凝聚不散则引起痈疡。

back, the fourth one is [the region where] the Back-Shu Acupoints [are located], and the fifth one is the neck. [When] carbuncles occur on these five regions, [the patient] will die. The disease that begins with the arm [can be treated by] needling [the Acupoints located on the Large Intestine Channel of] Hand-Yangming and [the Lung Channel of] Hand-Taiyin to induce sweat; the disease begins with the head [can be treated by] needling [the Acupoints located on the Bladder Channel of Foot-Taiyang to induce sweat; the disease begins with the shank [can be treated by] needling [the Acupoints located on the Stomach Channel of] Foot-Yangming to induce sweat. [Needling the Acupoints located on the Lung Channel of] Arm-Taiyin can induce sweat and [needling the Acupoints located on the Stomach Channel of] Foot-Yangming also can induce sweat. So excessive sweating due to needling [the Acupoints located on] the Yin [Channel] can be stopped by [needling the Acupoints located on] the Yang [Channel]; excessive sweating due to needling [the Acupoints located on] the Yang [Channel] can be stopped by [needling the Acupoints located on] the Yin [Channel].

21. 14 Wrong needling brings harm [to the patient]. [If the focus of the disease has already been] punctured but [the needle] is still retained in the Acupoint, [it will] consume Essence; [if the focus of the disease has] not been punctured but [the needle] has already been withdrawn, [it will] lead to accumulation of Qi⁽¹¹⁾. Notes:

[1] The Collateral Acupoint of Triple Yang refers to Feiyang (BL 58) which is the Collateral Acupoint of the Bladder Channel of Foot-Taiyang.

[2] The exact Acupoints to be needled are not clear. Ma Shi (马蒨) in the Ming Dynasty said it referred to Lieque (LU 7). Zhang Jiebin (张介宾) in the Ming Dynasty said that the Acupoints should include Yuji (LU 10) and Taiyuan (LU 9).

[3] The Acupoint located on the lower part of the Triple Yang refers to Feiyang (BL 58) which is the Collateral Acupoint of the Bladder Channel of Foot-Taiyang.

[4] The Collateral Acupoint of the Kidney Channel of Foot-Shaoyin is Dazhong (KI 4).

[5] Gujue (骨厥) is a Syndrome caused by impairment of Kidney-Yin. In Chapter 8 of Lingshu (灵枢·本神), it says, "Damage of Essence will cause ache, flaccidity and coldness of the bones (精伤则骨酸痿厥)."

[6] Foot-Shaoyang (足少阳) actually should be Hand-Shaoyang (手少阳), because Tianyou (天牖) is the sixteenth Acupoint on the Sanjiao (Triple Energizer) Channel of Hand-Shaoyang.

[7] Arm-Taiyin (臂太阴) is the same as Hand-Taiyin (手太阴). In the earliest record of Channels, such as the so-called Boshu (Silk Book) discovered in an ancient tomb in Mawangdui (马王堆) in the Hunan Province, the Channels named after hand were all named after arm. It shows that originally the Channels were named after arm and foot and later on such a nomenclature was changed. In the names of the Channels, arm was replaced by hand. In the text of this chapter, both arm and hand are used to name the concerned Channels. Maybe this chapter was compiled during the time that the nomenclature of the Channels was undergoing a historical change.

22.1 目眦外决于面者，为锐眦；在内近鼻者，为内眦；上为外眦，下为内眦。

22.2 癡疾始生，先不乐，头重痛，视举目赤，甚作极已而烦心，候之于颜，取手太阳、阳明、太阴，血变而止。

22.3 癡疾始作而引口啼哮喘悸者，候之手阳明、太阳，左强者攻其右；右强者攻其左，血变而止。癡疾始作先反僵，因而脊痛，候之

【译文】

22.1 眼角向外开裂于面颊一侧的，称为锐眦；向内靠近鼻侧的，称为内眦。上眼胞属外眦；下眼胞属内眦。

22.2 癡病将发作时，病人先感到闷闷不乐，头部沉重疼痛，两眼上视，目赤，严重时则会出现烦乱不宁。通过观察天庭部的色泽，可推测疾病的发作。治疗时可取手太阳、手阳明和手太阴三经的膻穴，待其血色正常时停针。

22.3 癡病发作时，口角常因牵引而歪斜，患者有啼哭、呼叫、喘促、心悸等症状，可取手阳明、手太阳两经膻穴治疗，凡向左侧牵引的，刺其右侧，向右侧牵引的，刺其左侧，待血色正常时停针。癡病发作时，腰脊反张僵硬，脊柱因此作痛，可取足太阳、足阳明、足

Notes:

[1] This part has nothing to do with this chapter. It may be misprinting or miscopying taking place in ancient times. In the book entitled *Taisu* (太素), this part was put into Chapter 23, “Discussion on Febrile Diseases” (热病第二十三) after the sentence “Yinqiao (阴跷 Yin Heel-Channel) can be needled to treat redness and pain of eyes that begins from the inner canthus.”

[2] Qionggū (穷骨), literally meaning the last bone, refers to Changqiang (GV 1) Acupoint located on the sacrum bone.

[3] Another explanation about this part is that the patient sweats profusely.

[4] The Channel that is internally and externally related to the Lung Channel of Hand-Taiyin is the Large Intestine Channel of Hand-Yangming.

[5] Jueni (厥逆) bears different meanings in *Neijing* (内经). Yao Zhi'an (姚止庵) in the Qing Dynasty said, “Jue (厥) bears three meanings. The first meaning is Ni (逆) which means Qi in the lower part of the body flows adversely upwards. That is what Jueni (厥逆) means. The second meaning is extreme. The concepts of Heat-Jue (热厥) and Cold-Jue (寒厥) in the Chapter of Discussion on Jue (厥) in *Suwen* (素问) imply that heat and cold have reached the extreme level. The third meaning is unconsciousness.”

[6] It refers to Changqiang (GV 1) Acupoint located on the sacrum bone.

Notes:

[1] Pianku (偏枯) is similar to hemiplegia in modern medicine.

[2] Fei (痺) is a sort of wind disease. The main symptom is inability to move the limbs. Lou Ying (楼英) in the Ming Dynasty said, “Fei (痺) is the severe case of Pianku (偏枯) in which pathogenic factors have deepened the invasion into the body. In fact Fei (痺) and Pianku (偏枯) are two different diseases. If Qi does not flow in half of the body, it is called Pianku (偏枯); if the hand and foot cannot move, it is called Fei (痺). No matter the patient’s body is half unmovable or completely unmovable, it is all called Fei (痺).”

[3] Yin and Yang (阴阳) here refer to Qikou (气口) pulse and Renying (人迎) pulse.

[4] The expression of “cold and heat hemorrhoids” seems to have nothing to do with the previous description. It must be miscopying and misprinting taking place in history.

[5] Heart-Hernia (心疝) is a sort of hernia caused by stagnation of Heart-Qi. The main symptoms are lower abdominal pain and mass.

[6] Gu (蛊) is a sort of tympanites like abdominal mass caused by invasion of pathogenic factors into the kidney. In Chapter 19 in Suwen (素问), it says, “The disease transmitted from the spleen into the kidney is called Shanjia (疝瘕). The symptoms are excessive heat and pain in the lower abdomen and nebulous urine. This disease is also called Gu (蛊).”

Notes:

[1] Jue-Headache (厥头痛) is a sort of headache due to adverse flow of Channel-Qi that lashes at the head. Zhang Jiebin (张介宾) in the Ming Dynasty said, "Jue (厥) means adverse flow of pathogenic factors in the Channels upward to the head and causing pain in the head. That is why it is called Jue-Headache."

[2] On the middle of the head runs the Dumai (督脉 Governor Vessel) and lateral to the Dumai (督脉 Governor Vessel) run the Bladder Channel of Foot Taiyang and the Gallbladder Channel of Foot-Shaoyang on both sides. Altogether there are five Channels running over the head.

[3] There are five Acupoints located on each of the five Channels running over the head. The five Acupoints on the Dumai (督脉 Governor Vessel) are Shangxing (上星 GV 23), Xinhui (凶会 GV 22), Qianding (前顶 GV 21), Baihui (百会 GV 20) and Houding (后顶 GV 19). The five Acupoints located on the Bladder Channel of Foot-Taiyang at both sides of the Dumai (督脉 Governor Vessel) are Chengguang (承光 BL 6), Tongtian (通天 BL 7), Luoque (络却 BL 8), Yuzhen (玉枕 BL 9) and Wuchu (五处 BL 5). The five Acupoints located on the Gallbladder Channel of Foot-Shaoyang at both sides of the Dumai (督脉 Governor Vessel) are Toulinqi (头临泣 GB 15), Muchuang (目窗 GB 16), Zhengying (正营 GB 17), Chengling (承灵 GB 18) and Naokong (脑空 GB 19).

[4] Genuine-Headache (真头痛) is caused not by adverse flow of Qi that lashes at the head, but by invasion of pathogenic factors directly into the brain. The sixtieth issue in the Nanjing (难经) says, "The headache caused by retention of pathogenic wind and cold in the three Yang Channels of the hand after attack is called Jue-Headache (厥头痛); the headache caused by direct invasion of pathogenic factors into the brain is called Genuine-Headache (真头痛)."

25.3 疾病发作后出现实证的，当先治其本，后治其标。疾病发作后出现正气不足的虚证的，当先治其标，后治其本。总之，必须谨慎地详察病情的轻重，根据病情，精心调治。病情轻缓的可以标本兼治，病情急重的，则抓住关键之所在，从主要方面下手治疗。先有大小便不利而后发生其他疾病的，应先治大小便不利这个本病。

root cause [of the disease].

25.3 A disease [with] excessive [pathogenic factors may cause other diseases] . The primary disease is the root and the secondary disease is the branch. Treatment should first concentrate on the root cause and then on the secondary cause. A disease [with] insufficient [Healthy-Qi may cause some other diseases] . The primary disease is the root while the secondary disease is the branch. Treatment should first concentrate on the branch and then on the root. [In general, doctors must] carefully examine the pathological changes and treat the disease with full attention. [If the disease is] mild, [treatment may] concentrate simultaneously on the root and branch aspects of the disease. [If the disease is] severe, [the treatment may] concentrate on one aspect of the disease. [To treat] difficulty in urination and defecation followed by other diseases, the treatment [should concentrate on] the root cause [which refers to the difficulty in urination and defecation].

Notes:

[1] Keqi (客气) refers to wind, cold, summer-heat, dampness, dryness and fire in the natural world. If they appear in the season that they should not emerge, they will become pathogenic factors and cause diseases.

[2] Tongqi (同气) refers to six climatic factors that occur in the due seasons, such as wind appearing in spring, summer-heat appearing in summer, dampness appearing in late summer, dryness appearing in autumn and cold appearing in winter. If human body cannot adapt to seasonal changes of weather, these six climatic factors may cause diseases.

Notes:

[1] There are different explanations about “depression” here. Ma Shi (马蒔) thought that it referred to Yingchuang (膺窗 ST 16) on the Stomach Channel of Foot-Yangming. Zhang Jingyue (张景岳) believed that it referred to Wuyi (屋翳 ST 15).

[2] Qijie (气街) is another name for Qichong (气冲 ST 30).

[3] Weijue (痿厥) refers to flaccidity and weakness of the four limbs or even disability of the four limbs due to disorder of Qi activity.

周痹第二十七

27.1 黄帝问于岐伯曰：“周痹之在身也，上下移徙随脉，其上下左右相应，间不容空，愿闻此痛，在血脉之中邪？将在分肉之间乎？何以致是？其痛之移也，间不及下针，其痛之时，不及定治，而痛已止矣。何道使然？愿闻其故？”

27.2 岐伯答曰：“此众痹也，非周痹也。”

27.3 黄帝曰：“愿闻众痹。”

27.4 岐伯对曰：“此各在其处，更发更止，更居更起，以右应左，以左应右，非能周也。更发更休也。”

27.5 黄帝曰：“善。刺之奈何？”

27.6 岐伯对曰：“刺此者，痛虽已止，必刺其处，勿令复起。”

27.2 岐伯回答说：“这是众痹，而不是周痹。”

27.3 黄帝说：“我想听你讲一讲众痹。”

27.4 岐伯回答说：“众痹，病邪分布在人体的各处，时发时止，疼痛随时出现，随时消失，左右相互影响，相互对应，而不是全身疼痛。其疼痛时发时止。”

27.5 黄帝说：“好。怎样针刺治疗呢？”

27.6 岐伯回答说：“针刺这种病，疼痛虽然已停止，但仍须针刺疼痛发作之处，不要让它再次发作。”

Chapter 27

Zhoubi: General Migratory Obstruction Syndrome

27. 1 Huangdi asked Qibo, “[When] Zhoubi^[1] attacks the body, [the pathogenic factors] move upward and downward along the Channels [in the body]. [The affected regions] are parallel to each other in the upper and lower [regions] as well as in the left and right [sides]. [The pain caused by this disease] affects the whole body. I’d like to know [whether the pathogenic factors that have caused] the pain is in the blood vessels or in the muscular interstices. What is the mechanism involved? The pain wanders so fast that is impossible to insert needles into it. When the pain has occurred, it may suddenly disappear before [the doctor has made the decision about how] to treat it. What is the reason? I’d like to know the causes.”

27. 2 Qibo answered, “This is Zhongbi^[1], not Zhoubi^[2].”

27. 3 Huangdi said, “I’d like to know what is Zhongbi.”

27. 4 Qibo answered, “[The pain caused by Zhongbi] affects every parts of the body. The occurrence and stoppage alternate. [When pathogenic factors] have accumulated, [it occurs]; [when pathogenic factors have disappeared, it] alleviates. [When it attacks, the pain caused in] the left side corresponds to that in the right side and vice versa. [But the pain] does not extend to the whole body, [actually it] occurs and stops alternatively.”

27. 5 Huangdi said, “Good! But how to treat it with acupuncture?”

27. 6 Qibo answered, “In dealing with this disease, needling treatment should be continued on the affected region though the

27.8 岐伯回答说：“周痹，就是邪气在血脉之中，随着血脉上下循行于全身，不能左右对应，邪气流窜到哪里，哪里就发生病。”

27.9 黄帝说：“怎样针刺治疗呢？”

27.10 岐伯回答说：“疼痛自上向下发展的，先刺其下部，以阻遏病邪的进一步发展，后刺其上部，以解除病痛；疼痛自下向上发展的，先刺其上部，以阻遏病邪的进一步发展，后刺其下部，以解除病痛。”

27.11 黄帝说：“好。这种疼痛是怎样产生的呢？为什么称做周痹？”

27.12 岐伯回答说：“风、寒、湿三气从外侵入分肉之间，将分肉间的津液压迫为沫，沫受寒后凝聚，就会排挤分肉使它分裂，肉裂就会发生疼痛，疼痛一发生，精神就会集中在疼痛的部位，精神集中

27. 8 Qibo answered, “Zhoubi [is caused by invasion of pathogenic factors] into the blood vessels and moves upward and downward along the Channels. [But it] corresponds to each other at the left side and the right side. [So the pain occurs] in the affected regions respectively. ”

27. 9 Huangdi asked, “How [to treat it with] needling?”

27. 10 Qibo answered, “[If] the pain moves from the upper [region] to the lower [region], the lower [region] is needled first [to prevent pathogenic factors from progressing] and then the upper [region] is needled to relieve the pain. [If] the pain moves from the upper [region] to the upper [region], the upper [region] is needled first to prevent further progress and then the lower [region] is needled to relieve the pain. ”

27. 11 Huangdi said, “Good! What is the cause of the pain and how is it named?”

27. 12 Qibo answered, “Invasion of pathogenic wind, cold and dampness into the superficial muscular interstices condense [body fluid] into froth [which] agglutinates with cold. [When] agglutinating, [it] squeezes out the muscular interstices and causes fissures that result in pain. Pain will [make the patient] concentrate his attention [on the location of pain]. Concentration of attention [on the location of pain] will bring on heat [because of accumulation of Yang in the place on which the attention of the patient is concentrated] . Heat will alleviate pain. Alleviation of pain will give rise to adverse progress [of pathogenic factors to

27.14 岐伯说：“这种病邪在内未深入脏腑，在外没有散发到皮肤，而留滞在分肉之间，致使真气不能周流全身，所以叫做周痹。因此，针刺痹症，必须首先按压并沿着足六经的分布部位，判断其病属虚属实，观察其大络血行有无瘀结不通现象及经脉是否空虚陷下，然后加以调治，或用熨法温通经络。如筋脉拘急坚劲，可按摩导引以行其气血。”

other parts of the body, which consequently] leads to occurrence of Bi-Syndrome. This is the pathogenesis of the disease.”

27. 13 Huangdi said, “Good! I have understood.”

27. 14 [Qibo said,] “[The pathogenic factor in this disease] has entered the body. But it has neither deepened into the viscera nor maintained in the skin. [In fact the pathogenic factor] just stays in the muscular interstices to prevent Zhenqi (Genuine-Qi) from circulating [all through the body] . That is why it is called Zhoubi. So [to treat] Bi-Syndrome with needling therapy, [the doctor] must press [the patient’ s body] along the six Channels [of foot] to determine whether [the state of pathological changes are] Xu (Deficiency) or Shi (Excess) [in nature], to see whether the blood in the large Collaterals flows smoothly or not and [to inspect] whether the Channels are empty and sunken or not [for the purpose of taking proper] treatment. [Besides,] ironing therapy [can be used] to dredge the Channels [through warming]. [If the Channels are] spasmodic and stiff, needling or massage therapy [can be used] to activate [Qi and blood].”

27. 15 Huangdi said, “Good! I have understood the mechanism and the therapeutic methods. The Nine [Needles] can regulate [Qi in] the Channels and [treat] the diseases of the twelve Channels of Yang or Yin [in nature].”

Notes:

[1] Zhongbi (众痹) refers to the sort of Bi-Syndrome that affects a large area at both sides which are in symmetry. The pain is paroxysmal and migratory.

[2] Zhoubi (周痹) refers to general migratory pain Syndrome due to invasion of pathogenic wind, cold and dampness into the blood vessels that flow to the whole body in the Channels.

口问第二十八

【原文】

28.1 黄帝闲居，辟左右而问于岐伯曰：“余已闻九针之经，论阴阳逆顺，六经已毕，愿得口问。”

28.2 岐伯避席再拜曰：“善乎哉问也，此先师之所口传也。”

28.3 黄帝曰：“愿闻口传。”

28.4 岐伯答曰：“夫百病之始生也，皆生于风雨寒暑，阴阳喜怒，饮食居处，大惊卒恐，则血气分离，阴阳破败，经络厥绝，脉道不通，阴阳相逆，卫气稽留，经脉虚空，血气不次，乃失其常。论不在经者，请道其方。”

28.5 黄帝曰：“人之欠者，何气使然？”

【译文】

28.1 黄帝闲居，让左右的人避开，对岐伯说：“我已经了解了关于九针的论述，也研究了阴阳逆顺的问题，对手足六经也很熟悉，我还希望学到一些你从别人的口述中得到的医学知识。”

28.2 岐伯离开座位，再拜说：“您问得好啊！这些知识都是先师口传给我的。”

28.3 黄帝说：“我很想听听这些口传的医学知识。”

28.4 岐伯说：“大凡疾病的发生，都是由风雨寒暑，房劳过度，喜怒不节，饮食不调，居处不适，大惊卒恐等原因导致了血气分离，阴阳失衡，经络闭塞，脉道不通，阴阳逆乱，卫气滞留而不能布散于外，经脉空虚，气血循行紊乱，于是人体就失去正常状态而生病。请让我谈谈古代经典上没有记载的一些有关的医学道理吧。”

28.5 黄帝问：“人打呵欠，是什么原因呢？”

Chapter 28

Kouwen: Questions and Answers

28.1 One day, Huangdi was at leisure. His Majesty dismissed the attendants and asked Qibo, "I have already known the records about the Nine Needles in the Canons. [You] have talked about the due and adverses running of Yin and Yang [Channels] and described the six Channels [in details]. I still want to know [the knowledge about medicine that you] have heard [from your teacher]."

28.2 Qibo left his seat, kowtowed again and answered, "What an excellent question Your Majesty have asked! This knowledge was all taught by my teacher."

28.3 Huangdi said, "Please tell me [about it]."

28.4 Qibo answered, "The occurrence of all diseases is exclusively due to [attack of pathogenic] wind, rain, cold and summer; or intemperance in sexual life and excessive changes of emotions; or improper diet and irregular daily life. [For example,] sudden shock and terror will separate Qi from blood, breaking [the balance between] Yin and Yang, obstructing the Channels and Collaterals. [When] the Channels are obstructed, [it will lead to] disorder of Yin and Yang, slow movement of Weiqi (Defensive-Qi), emptiness of the Channels and irregular flow of Qi and blood. [As a result, the normal condition of the human body] becomes morbid. This description is not included in the Canons, please allow me to explain it."

28.5 Huangdi said, "What [kind of] Qi is responsible for yawning?"

【原文】

28.6 岐伯答曰：“卫气昼日行于阳，夜半则行于阴，阴者主夜，夜者卧；阳者主上，阴者主下，故阴气积于下，阳气未尽，阳引而上，阴引而下，阴阳相引，故数欠。阳气尽，阴气盛，则目瞑；阴气尽而阳气盛，则寤矣。泻足少阴，补足太阳。”

28.7 黄帝曰：“人之哕者，何气使然？”

28.8 岐伯曰：“谷入于胃，胃气上注于肺。今有故寒气与新谷气，俱还入于胃，新故相乱，真邪相攻，气并相逆，复出于胃，故为

【译文】

28.6 岐伯说：“卫气白天行于阳分，夜间行于阴分。阴气主夜主静，入夜则睡眠；阳气主升发而向上，阴气主沉降而向下。故阴气聚集于下，阳气开始入于阴分，还未尽入，阳引阴气向上，阴引阳气向下，阴阳上下相引，于是连连呵欠。等到阳气都入于阴分，阴气盛时，就能闭目安眠；若阴气尽而阳气盛，人就醒了。对于这样的病，应该泻足少阴经，补足太阳经。”

28.7 黄帝问：“人患呃逆证，是什么原因呢？”

28.8 岐伯说：“正常情况下，饮食入胃，经过胃的腐熟、脾的运化，将精微上注到肺。患者胃中原有寒邪，又新进饮食，寒邪与食滞都留于胃中，新进的饮食与原有的寒邪相互扰乱，邪正相争，邪气与胃气搏结而同时上逆，再从胃中出，所以发生呃逆。治疗时，应补手太阴肺经，泻足少阴肾经。”

28. 6 Qibo answered, “WeiQi (Defensive-Qi) flows in the Yang [phase] in the daytime and in the Yin [phase] at night. Yin dominates in the night [and that is why people] sleep at night. Yang controls the upper while Yin controls the lower^[1]. So [when people are sleeping,] YinQi accumulates in the lower [region] and YangQi begins to enter Yin but has not completely merged with it. Yang drives [Yin] to move upward while Yin drives [Yang] to move downward. Yin and Yang act on each other. That is why [people are] frequently yawning. [When] YangQi is exhausted, YinQi will be predominant and therefore [people] close their eyes [to sleep]. [When] YinQi is exhausted, YangQi will be predominant and therefore [people] keep awake. [To treat this disease, the Acupoints located on the Kidney Channel of] Foot-Taiyin [can be needled with] reducing [techniques] and [the Acupoints located on the Bladder Channel of] Foot-Taiyin [can be needled with] reinforcing [techniques].”

28. 7 Huangdi said, “What [kind of] Qi is responsible for hiccup?”

28. 8 Qibo answered, “[When] food has entered the stomach, Stomach-Qi infuses into the lung in the upper. [If] there is Cold-Qi [still lingering in the stomach, it will interact with] the Food-Qi just taken in. The old and the new^[2] are conflicting with each other and the genuine and the evil^[3] are attacking each other, leading to adverse flow of Qi from the stomach and consequently resulting in hiccup. [This disease can be treated by needling the Acupoints on the Lung Channel of] Hand-Taiyin with reinforcing [techniques] and [the Acupoints located on the Kidney Channel of] Foot-Shaoyin with reducing [techniques].”

28.9 黄帝曰：“人之唏者，何气使然？”

28.10 岐伯曰：“此阴气盛而阳气虚，阴气疾而阳气徐，阴气盛而阳气绝，故为唏。补足太阳，泻足少阴。”

28.11 黄帝曰：“人之振寒者，何气使然？”

28.12 岐伯曰：“寒气客于皮肤，阴气盛，阳气虚，故为振寒寒栗，补诸阳。”

28.13 黄帝曰：“人之噫者，何气使然？”

28.14 岐伯曰：“寒气客于胃，厥逆从下上散，复出于胃，故为噫。补足太阴、阳明。”

【译文】

28.9 黄帝问：“人有时发出唏嘘抽咽，这是什么原因呢？”

28.10 岐伯说：“这是由于阴气盛而阳气虚，阴气运行快，阳气运行慢，阴气过盛，阳气衰微所造成。治疗时，应补足太阳经，泻足少阴经。”

28.11 黄帝问：“人发生振寒，是什么原因呢？”

28.12 岐伯说：“由于寒邪侵入皮肤，阴气盛，阳气虚，所以出现发冷、战抖的症状。治疗时，当采用温补各阳经的方法。”

28.13 黄帝问：“人发生噯气，是什么原因呢？”

28.14 岐伯说：“寒邪侵入胃中，厥逆之气从下向上扩散，再从胃中出，所以出现噯气。治疗时，应补足太阴经和足阳明经。”

28. 9 Huangdi said, “What [kind of] Qi is responsible for weeping?”

28. 10 Qibo answered, “This [is caused by] predominance of Yinqi and deficiency of Yangqi, rapid flow of Yinqi and slow movement of Yangqi or predominance of Yinqi and exhaustion of Yangqi. That is why [people are] weeping. [This disease can be treated by needling the Acupoints located on the Bladder Channel of] Foot-Taiyang with reinforcing [techniques] and [the Acupoints located on the Kidney Channel of] Foot-Shaoyin with reducing [techniques]. ”

28. 11 Huangdi said, “What [kind of] Qi is responsible for chills?”

28. 12 Qibo answered, “[This is caused by] invasion of Cold-Qi in the skin [which makes] Yinqi predominant while Yangqi deficient. That is why [people are] shivering with cold. [This disease can be treated by needling the Acupoints located on] the Yang Channels with reinforcing [techniques]. ”

28. 13 Huangdi said, “What [kind of] Qi is responsible for belching?”

28. 14 Qibo answered, “[This is caused by] invasion of Cold-Qi into the stomach [that disturbs Stomach-Qi and drives it] to flow adversely from the lower [region], disperse in the upper [region] and come out of the stomach. That is why [people are] belching. [This disease can be treated by needling the Acupoints located on the Kidney Channel of] Foot-Taiyin and [the Acupoints located on the Stomach Channel of] Foot-Yangming with reinforcing [techniques]. ”

28.19 黄帝曰：“人之哀而泣涕出者，何气使然？”

28.20 岐伯曰：“心者，五脏六腑之主也；目者，宗脉之所聚也，上液之道也；口鼻者，气之门户也。故悲哀愁忧则心动，心动则五脏六腑皆摇，摇则宗脉感，宗脉感则液道开，液道开，故泣涕出

28.16 岐伯说：“阳气流利，布满于心胸而上出于鼻，成为喷嚏。治疗时，应补足太阳荣穴通谷，以及眉根的攒竹穴。”

28.17 黄帝问：“人发生全身无力、疲困懈惰，是什么原因呢？”

28.18 岐伯说：“胃气虚，以致各经脉皆虚；经脉虚衰就导致筋脉懈惰无力；筋脉懈惰，若再强力入房，元气就不能恢复，于是出现懈惰无力的𦓐症。治疗时，应根据病变发生的重点部位，在分肉间施以补法。”

28.19 黄帝问：“人在哀伤的时候涕泪俱出，这是什么原因呢？”

28.20 岐伯说：“心是五脏六腑的主宰；眼睛是许多经脉聚会的地方，也是津液由上而外泄的道路；口鼻是气出入的门户。悲哀忧愁等情志变化，首先激动了心神，心神激动则影响到其他脏腑和各经脉，

28. 15 Huangdi said, “What [kind of] Qi is responsible for sneezing?”

28. 16 Qibo answered, “[This is caused by] smooth flow of Yangqi [that] distributes all over the chest and rushes out of the nose and causes sneezing. [This disease can be treated by needling] the Ying-Spring^[4] [located on the Bladder Channel of] Foot-Taiyang and the root of eyebrow^[5] with reinforcing [techniques].”

28. 17 Huangdi said, “What [kind of] Qi is responsible for lassitude?”

28. 18 Qibo answered, “[This is caused by] weakness of Stomach-Qi which leads to deficiency of all the Channels. Xu (Deficiency) of all Channels makes the tendons and vessels loose. [Under such a condition if the patient still] takes sexual activity, Qi cannot be restored. That is why flaccidity [of the limbs] is caused. [This disease can be treated by needling the Acupoints located] in the muscular interstices according to its location.”

28. 19 Huangdi said, “What [kind of] Qi is responsible for tearing due to sorrow?”

28. 20 Qibo answered, “The heart is the dominator of the Five Zang-Organs and the Six Fu-Organs. The eyes are [the places where] the tendons of all [Channels] converge and the pathways of upper fluids. The mouth and the nose are the doors of Qi. So sorrow, grief, worry and anxiety will disturb the heart. [When] the heart is disturbed, the Five Zang-Organs and the Six Fu-Organs will be shaken. 28.22 岐伯说：“忧愁思虑则心系急迫，心系急迫就约束气道，气道约束就呼吸不利，所以不时叹息以伸展其气。治疗时，应补手少阴经、手厥阴经，足少阳经，采用留针的方法。”

28. 21 Huangdi said, “What [kind of] Qi is responsible for sighing?”

28. 22 Qibo answered, “Worry and contemplation will tighten up the heart system. [When] the heart system is tightened up, the passageways will be restricted. [When the passageways of Qi are] restricted, they will become unsmooth. That is why [people are] sighing in order to breathe out. [The needles should be] retained.”

28. 23 Huangdi said, “What [kind of] Qi is responsible for drooling?”

28. 24 Qibo answered, “All foods enter the stomach [after being taken] . [If] there is heat in the stomach, parasites will move [because of the heat] . [When] the parasites are moving, [Qi of] the stomach will flow slowly. [If Qi of] the stomach moves slowly, Lianquan (CV 23) [beneath the tongue] will be open.

28. 27 Huangdi said, “What [kind of] Qi [makes people] bite their own tongues?”

28. 28 Qibo answered, “[This is caused by] upward adverse flow of Qi [that prevents the movement of] Channel-Qi to the proper places. [If] Qi from [the Channel of] Shaoyin flows adversely, [people will] bite their tongues [because the Channel of Shaoyin runs to the root of the tongue]; [if] Qi from [the Channel of] Shaoyang flows adversely, [people will] bite their cheeks [because the Channel of Shaoyang runs through the cheeks]; [if] Qi from [the Channel of] Yangming flows adversely, [people will] bite their lips [because the Channel of Yangming runs around the lips] . 29.1 黄帝曰：“余闻先师，有所心藏，弗著于方。余愿闻而藏之，则而行之，上以治民，下以治身，使百姓无病，上下和亲，德泽下流，子孙无忧，传于后世，无有终时，可得闻乎？”

29.2 岐伯曰：“远乎哉问也。夫治民与自治，治彼与治此，治小与治大，治国与治家，未有逆而能治之也，夫惟顺而已矣。顺者，非独阴阳脉论气之逆顺也，百姓人民皆欲顺其志也。”

29.2 岐伯说：“你提到的问题意义真深远啊！不论治民与自治，治彼与治此，治小与治大，治国与治家，从来没有违背常规而治理好的，只有顺应客观规律，才能治理好。所谓‘顺’，不仅是指医学上阴阳、经络、气血的逆顺，就是对待百姓人民都要顺其志。”

29.3 黄帝问：“怎样才能做到顺呢？”

Chapter 29

Shichuan: Instructions of the Teacher

29. 1 Huangdi said, “I have heard that the masters in ancient times established some theories which were not recorded in the inscribed wooden slips. I’d like to know these theories, bear them in mind and follow them [as the therapeutic principles so as] to treat [diseases for] the people and protect myself. [Through such a way of learning and practicing, I hope that I can] free all people from contracting diseases and [enable them] to live in harmony and carry forward the benevolence and virtue, so that the later generations will be free from suffering diseases and [such an excellent theory] can be handed down from generation to generation forever. Can I know these theories?”

29. 2 Qibo answered, “What a profound question Your Majesty have asked! No matter treating people or treating oneself, no matter treating this [disease] or that [disease], no matter dealing with a small [problem] or a big [problem], no matter governing a country or managing a family, [one] cannot be successful [if he] resorts to reverse ways. Only by following the due principle can [he] be successful. ‘Due’ here does not only refer to the normal running ways of Yin and Yang, the Channels and Collaterals as well as Qi [and blood]. It also includes conformity to the will of officials and people [in administration].”

29. 3 Huangdi said, “How to [act in] conformity [to the will of officials and people]?”

29.4 岐伯说：“到达一个国家后，要先弄清当地的风俗习惯；进入一个家庭，要先弄清人家的忌讳；登堂时要先弄清人家的礼节；临证时，要先弄清病人的喜好。”

29.5 黄帝问：“怎样通过了解病人的喜好来诊察疾病的性质呢？”

29.6 岐伯说：“因内热而致多食易饥的消瘴病，病人喜寒；属于寒邪内侵一类的病，病人就喜热。胃中有热，食物容易消化而总有饥饿感，胃中空虚难受，脐上的腹部发热；肠中有热，就会排出像糜粥一样的粪便，脐下的小腹部发热。胃中寒，则腹胀；肠中寒，则肠鸣、泄泻，粪便中有未消化的食物；胃中有热，肠中有寒，就易饥饿、小腹胀痛。”

29. 4 Qibo answered, “[When one wants] to enter into another country, [he has to] get familiar with the customs [followed by people in that country]; [when one wants] to go to others’ family, [he must try] to know the taboos [held in that family]; [when one wants] to enter into a hall, [he has to] inquire about the etiquettes; [when one is going] to treat a patient, [he must be] clear about the preference [of the patient].”

29. 5 Huangdi said, “How to diagnose a patient by knowing his preference?”

29. 6 Qibo answered, “[If the patient suffers from] Xiaodan^[1] due to interior heat, [he will] prefer cold; [if the patient suffers from the disease due to] cold in the middle, [he will] prefer heat. [Excessive] heat in the stomach will cause fast digestion, suspended sensation in the stomach, frequent hunger and feverish sensation in the skin above the navel. [Excessive] heat in the intestines will cause yellow chyme-like stool and cold sensation in the skin below the navel. [Excessive] cold in the stomach will cause abdominal distension; cold in the intestines will cause borborygmus and Sunxie (diarrhea with undigested food in it). [Excessive] cold in the stomach and [excessive] heat in the intestines will cause abdominal distension and diarrhea. [Excessive] heat in the stomach and [excessive] cold in the intestines will cause frequent hunger and pain and distension in the lower abdomen.”

29. 7 Huangdi said, “How to deal with [such a morbid condition in which the patient prefers] cold drinks due to cold in the stomach and hot drinks due to heat in the intestines [because] cold and heat are contradictory [in nature]? [Besides,] the princes, dukes and ministers [enjoy high position and live in comfort] .

29.9 黄帝问：“怎样治疗呢？”

29.10 岐伯说：“春夏季节，先治其标，后治其本；秋冬之季，先治其本，后治其标。”

29.11 黄帝问：“对那些性情与病情相矛盾的，又如何使其适宜呢？”

29.12 岐伯说：“要使之适宜，在日常生活中，要让病人调整饮食起居，顺应天气变化。天冷时，要加厚衣服，不要着凉；天热时，

What method [can the doctor use to treat the disease] in conformity [to the patient's will]? What treatment should be taken first?"

29. 8 Qibo answered, "It is human to dislike death and prefer living. [The doctor should] tell the patients [what are] harmful [to their health], let them know [what are] good [for their health], guides them [to do what they] like [for restoring their health] and tries to straighten them out of their anxiety. 29. 9 Huangdi said, "How to treat it then?"

29. 10 Qibo answered, "In spring and summer, treatment [should concentrate on] the Branch (secondary aspect) first and then on the Root (primary aspect); in autumn and winter, treatment [should concentrate on] the Root (primary aspect) first and then on the Branch (secondary aspect). "

29. 11 Huangdi said, "How to deal with it [if] the preference [of the patient] is in contradiction with [the treatment to be applied]?"

29. 12 Qibo answered, "The appropriate way [to deal with such a contradiction is] to instruct [the patient] to take proper food and clothes to adapt to the changes of weather. Jueqi: Differentiation of Qi

30. 1 Huangdi said, “I have heard that the human body contains Jing (Essence), Qi, Jin (thin fluid), Ye (thick fluid), Xue (blood) and Mai (Channels or vessels). I thought [these six different substances must] pertain to one single kind of Qi. But now they are named in six different ways. I don’t know what is the reason.”

30. 2 Qibo said, “[When] two spirits are interacting on each other^[1], [the reproductive Essence of a male and female] combines to conceive a fetus. [The reproductive substance that] exists before the conception of the fetus is called Jing (Essence).”

30. 3 [Huangdi asked,] “What is Qi?”

30. 4 Qibo said, “Shangjiao (Upper Energizer) initiates to spread the nutrients of food [to all parts of the body] to warm the skin, nourish the body and moisten the hair like irrigation of dew and fog. That is what Qi means.”

30. 5 [Huangdi asked,] “What is Jin (thin fluid)?”

30. 6 Qibo said, “Couli (muscular interstices) opens and sweat is discharged constantly from it. That is what Jin (thin fluid) means.”

30. 7 [Huangdi asked,] “What is Ye (thick fluid)?”

30. 8 Qibo said, “[When] food is taken into [the stomach,] the Qi (nutrients of food) fills up [the whole body]. [The thick part] infuses into the bones and enables the bone to flex and extend smoothly. [It further] infuses into [the body to] nourish the

30. 12 Qibo said, “To control Yingqi (Nutrient-Qi), [guide it flow along the track] and prevent it from overflowing, this is what Mai (Channel or vessel) means.”

30. 13 Huangdi said, “The six kinds of Qi^[2] [in the human body] are either excessive or insufficient. How [can you] know whether the Qi is abundant or insufficient, the brains are deficient or excessive, and the blood vessels are clear or turbid?”

30. 14 Qibo said, “Exhaustion of Jing (Essence) [will lead to] deafness; exhaustion of Qi [will lead to] blurred vision; exhaustion of Jin (thin fluid) [will lead to] looseness of Couli (muscular interstices) and profuse sweating; exhaustion of Ye (thick fluid) [will lead to] inflexibility of bones, lusterless complexion, consumption of brains, ache of legs and frequent tinnitus; exhaustion of blood [will lead to] pale complexion, lusterless hair and empty vessels. These are the external manifestations [of the six kinds of Qi when they are insufficient].”

30. 15 Huangdi said, “[Among] the six kinds of Qi, [which are] superior and [which are] inferior?”

Pingren Juegu: Fasting in Healthy People

32. 1 Huangdi said, "I'd like to know why people will die after seven days without taking food."

The Shangjiao (Upper Energizer) is responsible for distributing [Weiqi (Defensive-Qi)] and transporting the nutrients of food. 虚的。当肠中充满饮食物时，则胃中又是空虚的。肠胃总是处于充满和空虚的交替状态，所以气机才能上下畅行，五脏才能安定，血脉才能通利调顺，精神才能旺盛。因此，神气是由水谷精微之气所化生。所以肠胃之内经常要存留饮食二斗，水一斗五升。因此一般健康人每天都要解大便两次，每次排出二升半，一天共排出五升，七天内总计排出三斗五升。这样原来存留在肠胃中的水谷就被完全排尽。所以，健康人如果七天不饮食就会死亡。这是由于水谷精气津液都已耗竭所致。”

the stomach is empty. The fullness and emptiness [of the stomach and the intestines] are alternating. That is why Qi can move upward and downward, the Five Zang-Organs are stable, the blood vessels are smooth and the Spirit is vigorous. That is why it is said that the Spirit is transformed from the nutrients of food. Hence there should often be 2 Dou of food and 1 Dou and 5 Sheng of water in the intestines and the stomach [of healthy people] . So healthy people usually defecate twice a day, discharge 2.5 Sheng [of stool] each time. [Altogether healthy people discharge] 5 Sheng [of stool] each day. In seven days [they will discharge] 3 Dou and 5 Sheng [of stool which is the amount of food contained in the stomach and intestines] . Thus the food and water [in the intestines and stomach] has completely discharged. That is why healthy people will die after seven days without eating food and drinking water. The reason is that the food, water, Jingqi (Essence-Qi) and body fluid have been completely exhausted. ”

Note:

The measurement and weight units mentioned in this Chapter are explained in the previous chapter.

海论第三十三

【原文】

33.1 黄帝问于岐伯曰：“余闻刺法于夫子，夫子之所言，不离于营卫血气。夫十二经脉者，内属于腑脏，外络于肢节，夫子乃合之于四海乎？”

33.2 岐伯答曰：“人亦有四海，十二经水。经水者，皆注于海，海有东西南北，命曰四海。”

33.3 黄帝曰：“以人应之奈何？”

33.4 岐伯曰：“人有髓海，有血海，有气海，有水谷之海，凡此四者，以应四海也。”

33.5 黄帝曰：“远乎哉，夫子之合人天地四海也，愿闻应之奈何？”

33.2 岐伯回答说：“人体也有四海和十二经水，经水都留注于海。海有东、南、西、北之分，因此将其称为四海。”

33.3 黄帝说：“人体是怎样与四海相应的呢？”

33.4 岐伯说：“人体有髓海、血海、气海和水谷之海，这四海与自然界的四海相应。”

33.5 黄帝说：“这实在是一个很精深的问题，你把人身的四海与自然界的四海联系在一起，它们是怎样相应的呢？”

33.6 岐伯说：“必须先明确人身的阴阳、表里及经脉的荣、输等的分布情况，才可以确定人身的四海。”

Chapter 33

Hailun: Discussion on Seas

33. 1 Huangdi asked Qibo, “I have learned the needling techniques from you. Your description is always related to Ying (Nutrient-Qi), Wei (Defensive-Qi) blood and Qi. The twelve Channels are internally related to the Zang-Organs and Fu-Organs and externally connected with the limbs and joints. Can you explain [the relationship between] the twelve Channels and the four seas?”

33. 2 Qibo answered, “In the human body there also exist four seas and twelve rivers. The rivers all run into the seas. There are seas in the east, south, west and north respectively. That is what the four seas mean.”

33. 3 Huangdi said, “How does the human body correspond to [these seas and rivers]?”

33. 4 Qibo said, “In the human body there also exist [four seas, namely] sea of marrow, sea of blood, sea of Qi and sea of food and water. These four seas [in the human body] correspond to the four seas [in the natural world].”

33. 5 Huangdi said, “This is really a profound matter. You have related the human body to the four seas in the natural world. I’d like to know how they correspond to each other.”

33. 6 Qibo said, “First [one] has to be clear about Yin and Yang, External and Internal as well as Ying-Spring [Acupoint] and Shu-Stream [Acupoint] in the human body. [When he has understood these aspects, it will be very easy for him] to determine the four seas [in the human body].”

33.9 黄帝说：“对人体来说，这四海怎样是有利的，怎样是有害呢？如何促进生命活动，如何又使生命活动受到损害的呢？”

33.10 岐伯说：“若四海功能正常，生命力就旺盛；若四海功能失常，生命就会败亡。知道调养四海，就有利于健康；不知道调养四海，就有害于健康。”

33.11 黄帝说：“四海的正常和反常情况是怎样的呢？”

The brain is the sea of marrow, its infusing Acupoints are the one located in the vertex in the upper [region] and Fengfu (GV 16) in the lower [region].”

33. 9 Huangdi said, “How do these four seas benefit [the body], harm [the body], promote [the activity of life] and damage [the activity of life]?”

33. 10 Qibo said, “[When the functions of the four seas] are normal, [they] promote [the activity of life]; [when the functions of the four seas] are abnormal, [they] damage [the activity of life]; [when the functions of the four seas] are balanced, [they] benefit [the body]; [when the functions of the four seas] are imbalanced, [they] harm [the body].”

33. 11 Huangdi said, “What are the normal and abnormal states of the four seas?”

33. 12 Qibo said, “[When] the sea of Qi is superabundant, [it will cause] fullness of Qi in the chest, dysphoria, panting and red complexion; [when] the sea of Qi is insufficient, [it will cause] shortness of breath and inability to speak. 34.2 岐伯说：“五行的生克是有一定顺序的，四时气候的变化也有一定的规律，经脉的运行，与五行、四时的规律相适应，就可保持正常，相违背，就会引起逆乱。”

34.3 黄帝说：“什么是相顺？”

34.4 岐伯说：“十二经脉，与十二个月相应。十二个月分为四时，四时就是春、夏、秋、冬，其气候各不相同。人体营气与卫气，内外相随，阴阳协调，清气与浊气不相干犯，这样就能顺应四时而保持健康。”

Chapter 34 Wuluan: Five Disorders

34. 1 Huangdi said, “The twelve Channels pertain to the Wuxing (Five Elements) and correspond to the four seasons. What causes the disorders [of the twelve Channels]? How to normalize them?”

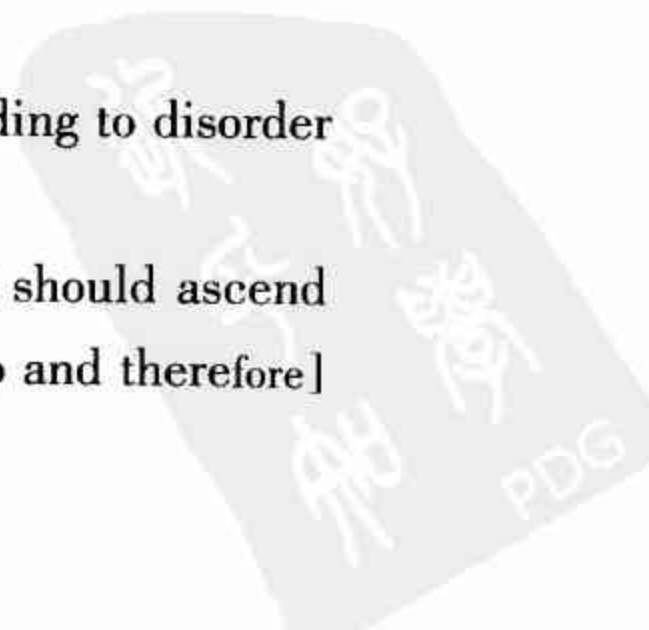

34. 2 Qibo said, “The Wuxing (Five Elements) [follow certain] orders [in restriction and promotion], [the weather] varies in the four seasons. Abiding by [the changes of Wuxing (Five Elements) and the four seasons, the twelve Channels will] move normally; violating [these changes, the twelve Channels will run in] disorder.”

34. 3 Huangdi said, “What does abidance mean?”

34. 4 Qibo said, “The twelve Channels correspond to the twelve months [in a year]. The twelve months are divided into the four seasons. The four seasons refer to spring, summer, autumn and winter. The weather in the four season varies. [If] Ying (Nutrient-Qi) and Wei (Defensive-Qi) flow in order, Yin and Yang will be in harmony, the Lucid and the Turbid [substances] will not attack each other. In this way [the Channels will] adapt to [the changes of weather in the four season and function] normally.”

34. 5 Huangdi said, “What does violation leading to disorder mean?”

34. 6 Qibo said, “Qingqi (Lucid-Qi) [which should ascend and maintain in the upper region now cannot rise up and therefore]

[These are all the manifestations of abnormal flow of the Channel-Qi]. [Though] Yingqi (Nutrient-Qi) flows along the Channels, Weiqi (Defensive-Qi) runs against the Channels. [Such a state of conflict between the Lucid and the Turbid disturbs the chest [and causes the problem] known as severe dysphoria. So disorder of Qi in the heart will cause dysphoria, restlessness, quietness and silence, bending the head and lying in pronation; disorder [of Qi] in the lung will [make the patient frequently] bend and raise the head [because of] panting and cross the hands [over the chest to aid] breath; disorder [of Qi] in the intestines and stomach will cause cholera; disorder [of Qi] in the arm and leg will cause coldness of the four limbs; disorder [of Qi] in the head will cause adverse flow [of Qi which then leads to] heaviness of the head, dizziness and faint. ”

Zhanglun: Discussion on Distension

35. 1 Huangdi said, “What kind of pulse appearing over Cunkou indicates distension?”

35. 2 Qibo said, “[If] the pulse is large, hard and unsmooth, [it indicates] distension.”

35. 3 Huangdi said, “How [do you] know [whether] the distension [occurs] in the Zang-Organs or the Fu-Organs?”

35. 4 Qibo said, “Yin [pulse indicates that the distension occurs] in the Zang-Organs while Yang [pulse indicates that the distension occurs] in the Fu-Organs.”

35. 5 Huangdi said, “[Disorder of] Qi causes distension. [Does it occur] in the blood vessels or in the Zang-Organs and Fu-Organs?”

35. 6 Qibo said, “[Disorder of Qi may] occur in all the three [aspects]. But [they are] not the places where distension is located.”

35. 7 Huangdi said, “I’d like to know the place where distension is located.”

35. 8 Qibo said, “Distension all occurs outside the Zang-Organs and Fu-Organs. [It] suppresses the Zang-Organs and Fu-Organs and dilates the chest and hypochondria, making the skin distended. That is why it is called distension.”

35.10 黄帝说：“你没有理解我的意思。我再重复一次。”

The throat and the small intestines are [the passageways to] transmit [food and water] . The stomach and its five passes (laryngopharynx, cardia, pylorus, ileocecal junction and anus) are like the doors of an alley. Lianquan (CV 23) and Yuying are the passages of Jin (thin fluid) and Ye (thick fluid) . So the Five Zang-Organs and the Six Fu-Organs all have their own boundaries and the diseases [related to them] have different manifestations. [If] Yingqi (Nutrient-Qi) flows along the Channels while Weiqi (Defensive-Qi) runs against the Channels, [it will cause] distension of the Channels. [If] Weiqi (Defensive-Qi) flows inside the Channels and runs [in the muscular interstices], [it will cause] distension of skin. [It can be treated by needling] Zusanli (ST 36) with reducing [techniques]. [If the distension is] light [with short duration, it will be cured by needling just for] once; [if the distension is] severe [with longer duration, it will be cured by needling] three times^[2]. [In treating distension, there is no need to consider whether it is of] Xu (Deficiency) or Shi (Excess), just resort to needling with reducing [techniques]."

Wulong Jinye Bie: Differentiation of Retention of Five Kinds of Fluid

36. 1 Huangdi asked Qibo, “[When] food and water are taken into the stomach and intestines through the mouth, the fluid [transformed from food and water] is divided into five categories. [If people put on] thin clothes in cold weather, [the fluids in the body] will transform into urine and Qi; [if people put on] thick clothes in hot weather, [the fluids in the body] will transform into sweat. Wuyue Wushi: Five Observations and Five Manifestations

37.1 Huangdi asked Qibo, “I have heard that in performing needling, the five sensory organs and the five observations can be used to examine five kinds of Qi (the functions of the Five Zang-Organs). The five kinds of Qi are the external manifestations of the Five Zang-Organs and the indications [of the changes of] the five seasons. I’d like to know how [the changes of the functions of] the Five [Zang-Organs] are manifested.”

37.2 Qibo said, “The five sensory organs are the external manifestations of the Five Zang-Organs.”

37.3 Huangdi said, “I’d like to know their manifestations so that they can be used as the criteria [of diagnosis].”

37.4 Qibo said, “The pulse [conditions are] manifested over Cunkou; the luster is manifested on the nose; the colors of blue, red, yellow, white and black appear alternately to correspond to the five seasons respectively. [If pathogenic factors progress] along the Channels into the Zang-Organs, the treatment must concentrate on the interior [aspect].”

37.5 Huangdi said, “Good! Does the observation of the five colors only restrict to the nose?”

37.6 Qibo said, “[The examination] begins first with the five sensory organs, then extends to the broad forehead and finally to the nose. [If] the nose is wide and big, [the side of] the cheek and tragus are chubby, the muscles in the face are thick like walls with a high chin, normal manifestation of the five colors and regular features, [the person] will live for one hundred years. Nishun Feishou: Abnormality, Normality, Obesity and Emaciation

38. 1 Huangdi asked Qibo, “I have listened to your explanation about the theory of acupuncture. I have understood much of the content. The theory and methods you have expounded are very effective [in treating diseases]. With such a treatment, even the most stubborn diseases cannot linger any more. Is your knowledge studied from others or accumulated through careful observation and contemplation?”

38. 2 Qibo said, “The methods followed by the sages [in studying] conform to the heavens in the upper [region], accord with the earth in the lower [region] and tally with human affairs in the middle [region]. [Hence they do everything in keeping with] certain rules and principles. [They] establish criteria and standards [based on these rules and principles for people] to follow and obey. In such a way [these criteria and stands] are passed on from generation to generation. It is just like a carpenter who cannot do measurement without rulers and determine a plane without using strings and ink. It is just like a worker who cannot draw a circle without using a pair of compasses or draw a square without using a ruler. This is the general rule for dealing with natural things and is easy to understand and use. [This law also can be used as] a rule to decide normal and abnormal [condition in dealing with diseases].”

sub-branches] . Another lower branch of it joins [the Kidney] Channel [of Foot-] Shaoyin and infuses into the three Yin [Channels of Foot] . Its anterior part runs in hiding, emerging from the dorsum of foot, running to the great toe and infusing into different Channels to warm the muscles. So if the separate Collaterals are obstructed, [the Channel-Qi in] the dorsum of foot will not move. [If the Channel-Qi in the dorsum of foot] does not move, [it indicates that the Channel is] stagnated. And stagnation [of the Channels will cause] coldness [of the foot]. ”

38. 23 Huangdi said, “How to differentiate [such pathological changes]?”

38. 24 Qibo said, “[The doctor should] give [the patient] some instructions first. [Then he may] press [certain parts of the patient] to examine [local conditions]. [If Qi and blood are] not [stagnated, the artery over the dorsum of the foot] must pulsate. According to such a phenomenon, the normal and abnormal [states of the Channels] can be determined. ”

38. 25 Huangdi said, “What a magic theory! The principles established by the sages are as clear as the sun and the moon and as subtle as the finest things. If it were not you, who else could make it clear! ”

血络论第三十九

Xueluo Lun: Discussion on Blood Collaterals

39. 1 Huangdi said, "I'd like to know [the disease caused by] a kind of strange Xie (Evil) that does not invade the Channels."

39. 2 Qibo said, "[It is a kind of pathogenic factors that have remained in] the blood Collaterals."

39. 3 Huangdi said, "Why [the patient] faints [when the doctor] pricks the blood Collaterals? Why the blood sometimes spurts [when the blood Collaterals are pricked for] bloodletting? Why sometimes the blood is black and turbid? Why sometimes the blood is thin and half of it appears like water? Why swelling is caused after needling? Why [the patient] looks pale no matter much blood is let out or just a little blood is let out? Why [the patient] does not show any change of complexion but just feels oppressed in the chest after the withdrawal of the needle? Why [the patient] does not feel uncomfortable when much blood is let out? I'd like to know the reasons."

39. 4 Qibo said, "[When] the Channel-Qi is abundant and blood is deficient, needling will lead to exhaustion of Qi and exhaustion of Qi will cause fainting. [If] both the Qi and blood are abundant and Yinqi is excessive, the blood will flow swiftly. [When] pricked, [blood will] spurt [from the Channels]. [If] Yangqi accumulates for a long time without being reduced, the blood will become black and turbid. That is why [the blood] does not spurt [when pricked]. [When the patient has] just drunk

其血黑以浊，故不能射。新饮而液渗于络，而未合和于血也，故血出而汁别焉；其不新饮者，身中有水，久则为肿。阴气积于阳，其气困于络，故刺之血未出而气先行，故肿。阴阳之气，其新相得而未和合，因而泻之，则阴阳俱脱，表里相离，故脱色而苍苍然。刺之血出多，色不变而烦惋者，刺络而虚经，虚经之属于阴者，阴脱，故烦惋。阴阳相得而合为痹者，此为内溢于经，外注于络。如是者，阴阳俱有余，虽多出血而弗能虚也。”

39.5 黄帝曰：“相之奈何？”

【译文】

血色黑而浓浊，所以不能喷射出来；刚刚喝过水，水液渗入络脉，尚未与血混合时，所以针刺放出的血中有水液夹杂而显清稀淡薄；如果不是刚饮过水而放出之血中有较多水分，则说明病人体内积有水气，日久便会形成水肿；阴气积蓄于阳分，困滞在络脉，故针刺时血未出而气先行，阴气闭于肉腠则发肿；阴阳二气刚刚相合而尚未调和，此时用泻法针刺，就会使阴阳耗散，表里相离，出现面色苍白的现象；刺络时血出较多，但面色不变而心胸烦闷的，是由于刺络使经脉随之而虚，若虚弱之经脉属阴，则可引起相应的五脏阴精虚脱，从而导致心胸烦闷；阴阳之邪相合壅闭于内，则形成痹症，邪气内溢于经，外注于络，使阴分阳分之邪俱盛有余，所以针刺时虽出血较多，也不会导致虚弱。”

39.5 黄帝说：“怎样观察血络呢？”

water, [water will] permeate through the Collaterals but has not mixed up with the blood. That is why [when the Collateral is pricked] a mixture of blood and water comes out. [If the patient has] not drunk water [but there is much water in the blood], [it is due to the fact that] there is water inside the body. [If the water retains in the body] for a long time, [it will] cause edema. [When] Yinqi accumulates in the Yang [phase] and encumbers the Collaterals, Qi will come out before the blood does. [after needling] . [As a result, the blood is stagnated in the local region.] That is why swelling is caused. [When] Qi of Yin and Yang have just met but have not balanced, [wrong application of] reducing [techniques in needling the Collaterals] will lead to exhaustion of both Yin and Yang and separation of the External and Internal. That is why [the complexion of the patient] appears pale. [The reason that the patient] feels oppressed in the chest without any change of the complexion after heavy bloodletting induced by needling is that the Channels also become deficient after the Collaterals are pricked. [If] the deficient Channels are Yin [Channels], [it will cause] exhaustion of Yin [Essence]. That is why [the patient feels] oppressed in the chest. [When pathogenic factors of] Yin and Yang [nature] combine [and accumulate inside the body], Bi-Syndrome will be caused. [Then the pathogenic factors] overflow in the Channels and infuse into the Collaterals. [As a result, the pathogenic factors in] both the Yin and Yang [Channels] are excessive. That is why much blood is let out [by pricking] but [the phenomenon of] Xu (Deficiency) is not caused. ”

39.5 Huangdi said, “How to observe [blood Collaterals] then?”

【原文】

39.6 岐伯曰：“血脉者，盛坚横以赤，上下无常处，小者如针，大者如筋，则而泻之万全也。故无失数矣。失数而反，各如其度。”

39.7 黄帝曰：“针入而肉著者，何也？”

39.8 岐伯曰：“热气因于针，则针热，热则肉著于针，故坚焉。”

39.6 岐伯说：“血脉盛的，络脉坚硬、充血而发红，或上或下，无固定部位，小的像针，大的像筷子。看到这种情况，即可在该处针刺放血，万无一失。施治时，切不可违背针刺原则，否则非但没有疗效，还会导致各种不良后果。”

39.7 黄帝说：“进针后，针身被肌肉裹住，这是什么原因呢？”

39.8 岐伯说：“这是因为体内热气作用于针，使其发热。针身发热，就会使肌肉与针裹在一起，不能转动。”

39. 6 Qibo said, “[If there are] excessive [pathogenic factors] in the blood vessels, [the blood Collaterals will be] hard, full and red, [fluctuating] upward or downward without fixed location. The minute one appears like a needle and the large one appears like a chopstick. [This problem] can be cured [by needling with] reducing [techniques] . So [in treating this disease, the doctor] should not violate the corresponding principles. Violation of these principles [will cause various problems as] mentioned above.”

39. 7 Huangdi said, “Why the needle is twined by muscles after insertion?”

39. 8 Qibo said, “[This is because] the needle is warmed by heat [before it is inserted into the muscle]. Hot needle tends to be twined with the muscles. That is why [the needle] holds tight [inside the muscle].”

40.3 黄帝曰：“余问一人，非问天下之众。”

40.4 岐伯曰：“夫一人者，亦有乱气，天下之众，亦有乱人，其合为一耳。”

40.5 黄帝曰：“愿闻人气之清浊。”

40.6 岐伯曰：“受谷者浊，受气者清。清者注阴，浊者注阳。浊而清者，上出于咽；清而浊者，则下行。清浊相干，命曰乱气。”

40.1 黄帝说：“我听说人体的十二经脉与自然界的十二条河水相应。自然界河流的颜色与清浊各不相同，而人体的血气却都是一样的，其相应的情况是怎样呢？”

40.2 岐伯说：“人体内的血气若真的一样的话，那么普天下则可整齐划一了，哪里还会有作乱的人呢？”

40.3 黄帝说：“我所问的是一个人的情况，不是问天下大众的情况！”

40.4 岐伯说：“就一个人而言，也有气乱的情况发生。而天下大众之中，也有犯上作乱之人，道理是一样的。”

40.5 黄帝说：“我想了解人体之气的清浊情况。”

40.6 岐伯说：“人体受纳水谷所化生的是浊气，吸收自然之气所化生的是清气。清气注入于阴分入脏，浊气输布于阳分入腑。水谷浊气之中的清者上升于咽喉，清气之中的浊者则下行。如果清气与浊气互相干扰，这就叫做‘乱气’。”

Yinyang Qingzhuo: Yin and Yang, Lucidity and Turbidity

40. 1 Huangdi said, “I have heard that the twelve Channels correspond to the twelve rivers. [The twelve rivers are] different in colors and vary in clearness and turbidity. [But] the blood and Qi [in the twelve Channels] are the same. How do they correspond to each other?”

40. 2 Qibo said, “[If] the blood and Qi in the human body are the same, then everything in the world will be uniform. [If this were the case,] how could any disorders happen?”

40. 3 Huangdi said, “I have asked you about one single person, not about all the people in the world. ”

40. 4 Qibo said, “In a single person, there must exist disorders of Qi; in the whole world, there must exist turmoil makers. He reason is the same. ”

40. 5 Huangdi said, “I’ d like to know the clearness and turbidity of Qi in the human body. ”

40. 6 Qibo said, “[The Qi in the human body that is derived from] food taken [into the body] is turbid and [the Qi that comes from the fresh] air breathed in is clear. The clear [Qi] infuses into the Yin (Zang-Organs) and the turbid [Qi] pours into the Yang (Fu-Organs). The clear [Qi that is derived from] the turbid [Qi] ascends to the throat; the turbid [Qi that comes from] the clear [Qi] descends. The interaction between the clear [Qi] and the turbid [Qi] is called disordered Qi. ”

40.8 岐伯曰：“气之大别，清者上注于肺，浊者下走于胃。胃之清气，上出于口；肺之浊气，下注于经，内积于海。”

40.9 黄帝曰：“诸阳皆浊，何阳浊甚乎？”

40.10 岐伯曰：“手太阳独受阳之浊，手太阴独受阴之清。其清者上走空窍，其浊者下行诸经。诸阴皆清，足太阴独受其浊。”

40.11 黄帝曰：“治之奈何？”

【译文】

40.7 黄帝说：“所谓阴清而阳浊，浊气之中有清气，清气之中有浊气，如何分别清气与浊气呢？”

40.8 岐伯说：“气的大致区别是这样的：清气上注于肺脏，浊气下行而入于胃腑。胃腑浊气所化生的清气上升于口。肺脏的清气所化生的浊气下注于经脉，内积于气海。”

40.9 黄帝说：“所有阳经都受浊气的渗入，其中哪一经所受浊气最甚呢？”

40.10 岐伯说：“手太阳小肠经所受的浊气最多，手太阴肺经所受的清气最多。清气上走于空窍，浊气下行于诸经。五脏都受纳清气，只有足太阴脾经独受浊气。”

40.11 黄帝说：“清浊之气异常应当怎样治疗呢？”

40. 8 Qibo said, “The difference between [the clear and turbid] Qi is like this: The clear [Qi] ascends to infuse into the lung and the turbid [Qi] descends to enter the stomach. The clear Qi of the stomach ascends to come out from the mouth while the turbid Qi of the lung descends to infuse into the Channels and accumulate in the sea [of Qi in the chest].”

40. 9 Huangdi said, “The turbid [Qi infuses into] all the Yang [Channels]. But which one [receives] most [of the turbid Qi]?”

40. 10 Qibo said, “[The Small Intestine Channel of] Hand-Taiyang receives most of the turbid [Qi because the small intestine receives food and water from the stomach and separates the clear from the turbid]. [The Lung Channel of] Hand-Taiyin receives most of the clear [Qi because the lung controls Qi and governs respiration]. The clear [Qi usually] ascends to flow in the upper orifices while the turbid [Qi] descends to flow in the [Yang] Channels. All the Yin [Channels] receives the clear [Qi], but [the Spleen Channel of] Foot-Taiyin receives most of the turbid [Qi because the spleen manages transportation and transformation and is internally and externally related to the stomach].”

Notes:

[1] "Ten days" refers to one of the three periods in a month according to Chinese lunar calendar.

[2] March and April are the months during which Yang in the natural world has developed to its peak. The months before these two are January and February which govern Shaoyang; the months following these two are May and June which govern Taiyang.

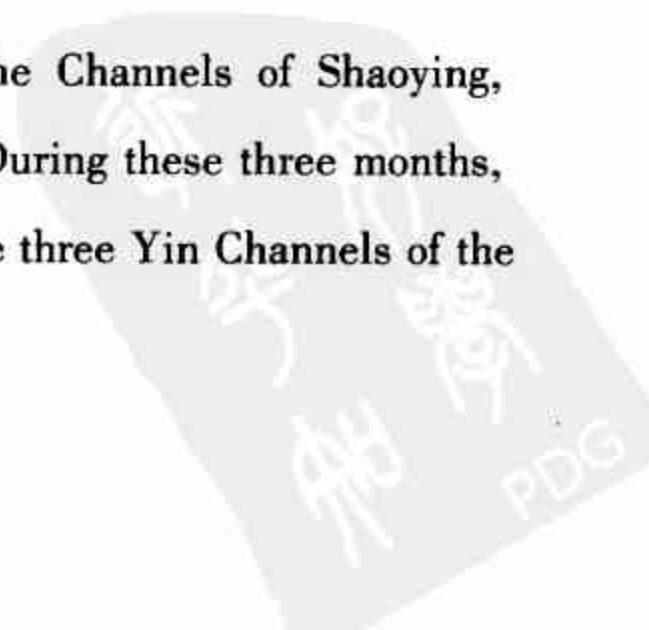

[3] The months of July, August, November and December govern Shaoyin and Taiyin Channels respectively. September and October are ranked at the middle of these four months which is the period that Yinqi converges. That is why this period is called Jueyin which means extreme Yin.

[4] Renqi (人气 Human-Qi) refers to the Channel-Qi that is predominant in the right time.

病传第四十二

【原文】

42.1 黄帝曰：“余受九针于夫子，而私览于诸方，或有导引行气，乔摩、灸、熨、刺、焮、饮药之一者，可独守耶，将尽行之乎？”

42.2 岐伯曰：“诸方者，众人之方也，非一人之所尽行也。”

42.3 黄帝曰：“此乃所谓守一勿失，万物毕者也。今余已闻阴阳之要，虚实之理，倾移之过，可治之属，愿闻病之变化，淫传绝败而不可治者，可得闻乎？”

42.4 岐伯曰：“要乎哉问。道，昭乎其如日醒，窘乎其如夜瞑，

42.1 黄帝说：“我从您这里学习了九针的知识，自己又阅读了一些方书，其中有导引、行气、按摩、灸、熨、针刺、火针及服药等疗法。应用时是只采取其中的一种疗法呢，还是同时采用多种疗法呢？”

42.2 岐伯说：“方书上的各种疗法是为适应众人之病而设的，当然不能在一个人身上都使用。”

42.3 黄帝说：“这就是掌握总的原则而不违背，就能解决各种复杂问题的道理。现在我已经懂得了阴阳的要点，虚实的道理，因失于调护而造成的疾病，以及治愈疾病的各种方法。我想了解疾病的变化，以及邪气在体内传变所导致脏气败绝而难以救治的情况。你可以告诉我吗？”

42.4 岐伯说：“这个问题至关重要。这些医学道理，明白了它就象白天头脑清醒一样，如不明白就象在黑夜中昏睡一样，什么都难以察觉。所以不但要接受和掌握这些道理，还要按照它去实际运用，

Bingchuan: Transmission of Diseases

42. 1 Huangdi said, “I have studied the Nine Needles from you and have read some medical books myself. [The therapeutic methods I have studied] mainly include Daoyin^[1], Xingqi^[2], Qiaomo^[3], moxibustion, ironing, needling, scorching and medicated decoction. [Should doctors] just stick to one of the methods or use all of them?”

42. 2 Qibo answered, “The therapeutic methods [recorded in the books were developed for] treating different diseases, not just for treating the disease of one person.”

42. 3 Huangdi said, “That means [once you have] grasped the main principle, [it will be possible for you] to deal with many other different things. Now I have understood the gist of Yin and Yang, the theory of Xu (Deficiency) and Shi (Excess), the result due to therapeutic errors and curable diseases. I’d like to know the changes of diseases and the incurable diseases due to extensive transmission [of pathogenic factors that impair the viscera]. Could you tell me?”

42. 4 Qibo answered, “Your Majesty’s question is very important! [As to medical] principle, it may be as clear as being in the daytime with a clear mind [if you have understood it] and it may be as obscure as being in deep sleep in the night [if you have not understood it]. [If a doctor can] adopt and follow this theory, [he will certainly reach a] miraculous [realm] and obtain satisfactory curative effect. [If a doctor can] grasp [the gist of this

[1] Daoyin (导引) is a kind of exercise used to cultivate health and cure disease through moving the limbs and regulating breath. Another explanation about Daoyin (导引) is that it is an exercise just for moving the limbs. For instance, Wang Bing (王冰) in the Tang Dynasty said, “Daoyin means to shake the tendons and bones and to move the limbs and joints.”

[2] Xingqi (行气) is an exercise for cultivating health and curing disease by means of regulating activity of Qi through mental manipulation.

[3] Qiaomo (乔摩) is similar to Anmo (按摩 massage).

[4] Daqi (大气) here refers to serious pathogenic factors.

[1] Zhengxie (正邪) refers to various factors that stimulate and disturb normal physical and mental activities, such as emotional changes, hunger and overstrain.

[2] Qi (气) here refers to pathogenic factors.

[3] Reverse-Qi (厥气) refers to Qi that flows in a reverse way. In the Chapter of Discussion on Bi-Syndrome in Suwen(素问), it says, “Upward flow of Reverse-Qi will cause fear. ” Wang Bing (王冰) in the Tang Dynasty said, “When reverse flow of Qi attacks the heart, it will cause fear and terror. ”

[4] The original Chinese characters for “wandering about” are You (游 wander or swim) and Xing (行 march or walk). Another explanation about these two characters is to swim in water.

Division of the Four Seasons in One Day

44. 1 Huangdi said, “The occurrence of all diseases is exclusively caused by [pathogenic] dryness, dampness, summer-heat, wind and rain, intemperance in sexual intercourse, [excessive] joy and anger, improper diet and irregular daily life. Combination [of internal pathogenic factors with external] pathogenic factors brings about various diseases [which are] named according to the viscera [that they have attacked] . I’m clear about all these problems. All diseases usually appear alleviated in the morning, quietude in the daytime, deteriorated at the dusk and severe at night. What is the reason?”

44. 2 Qibo answered, “It is due to changes of Qi in the four seasons.”

44. 3 Huangdi said, “I’d like to know the changes of Qi in the four seasons.”

44. 4 Qibo said, “Spring [is the season characterized by] resuscitation, summer [is the season characterized by] growth, autumn [is the season characterized by] harvest and winter [is the season characterized by] storage. This is the normal [changes of] Qi to which human body also responds. To divide one day into the four seasons, the morning corresponds to spring, the noon corresponds to summer, evening corresponds to autumn and midnight corresponds to winter. In the morning Renqi (Human-Qi) begins to generate and Bingqi (Morbid-Qi) begins to decline. That is why

44.5 黄帝说：“疾病在一天中的轻重变化，有时没有旦慧、昼安、夕加、夜甚的情况，这是为什么呢？”

44.6 岐伯说：“这是疾病变化不与四时之气相应，内脏单独主宰疾病的发生，这样的疾病，必定在受病内脏被时日所克的时候加重，受病内脏克制时日的时候病轻减。”

44.7 黄帝说：“如何治疗呢？”

44.8 岐伯说：“治疗时，根据时日与受病脏器的五行关系施以补泻，疾病就有治愈的希望。能这样做，就是高明的医生，不能这样做的，就是粗劣的医生。”

[the patient feels] alleviated in the morning. At noon, Renqi (Human-Qi) continues to grow and begins to dominate over Xie (Evil-Qi) . That is why [the patient is in] quietude. In the evening, Renqi (Human-Qi) begins to decline and Xieqi (Evil-Qi) starts to grow. That is why [diseases begin] to deteriorate [in the evening] . At midnight, Renqi (Human-Qi) enters the viscera and Xieqi (Evil-Qi) alone dominates over the whole body. That is why [diseases begin] to worsen [at night]. ”

44. 5 Huangdi asked, “Why some diseases manifest differently?”

44. 6 Qibo answered, “This is [due to the fact that the changes of diseases] do not respond to [the changes of] the four seasons. [This phenomenon occurs when one single] Zang-Organ alone is involved. [This disease] must become worsened [at the time when the element among the Wuxing (Five Elements) to which the affected organ pertains is] restricted by [the element among the Wuxing (Five Elements) to which] the period of time [pertains] . [However, when the element among the Wuxing (Five Elements) to which] the affected organ [pertains] restricts [the element among the Wuxing (Five Elements) to which] the period of time [pertains], [the disease becomes] lighter. ”

44. 7 Huangdi asked, “How to treat it then?”

44. 8 Qibo answered, “[If it is treated] according to the proper correspondence [between the time and the affected organs], the disease can be cured. [Those who treat diseases] according to this proper correspondence are excellent doctors while [those who treat diseases] in contravention to this correspondence are unskillful doctors. ”

44.10 岐伯说：“人有五脏，五脏各有五种变化，每种变化又有五输穴与之相应，五五二十五个输穴，又分别与五季相应。”

44.11 黄帝说：“我想知道什么是五变？”

44.12 岐伯说：“肝为牡脏，在色为青，在时为春，在日为甲乙，在音为角，在味为酸；心为牡脏，在色为赤，在时为夏，在日为丙丁，在音为徵，在味为苦；脾为牝脏，在色为黄，在时为长夏，在日为戊己，在音为宫，在味为甘；肺为牝脏，在色为白，在时为秋，在日为庚辛，在音为商，在味为辛；肾为牝脏，在色为黑，在时为冬，在日为壬癸，在音为羽，在味为咸。这就是五变。”

44.13 黄帝说：“以五变分主五输穴是怎样的呢？”

44. 9 Huangdi said, “Good! I have heard that there are five changes^[1] in needling to decide the five Shu Acupoints^[2]. I’d like to know the rules.”

44. 10 Qibo said, “Human body contains the Five Zang-Organs, the Five Zang-Organs have five changes, the five changes correspond to the five Shu Acupoints. Five times five is twenty-five Acupoints which correspond to the five seasons^[3].”

44. 11 Huangdi said, “I’d like to know the five changes.”

44. 12 Qibo said, “The liver is a male-like organ^[4] and is [related to] blue in colors, spring in the seasons, the days of Jia and Yi [in the Ten Heavenly Stems], Jiao in notes [of traditional Chinese music] and sourness in tastes. The heart is a male-like organ and [is related to] red in colors, summer in seasons, the days of Bing and Ding [in the Ten Heavenly Stems], Zhi in notes [of traditional Chinese music] and bitterness in tastes. The spleen is a female-like organ and [is related to] yellow in colors, late summer in seasons, the days of Wu and Ji [in the Ten Heavenly Stems], Gong in notes [of traditional Chinese music] and sweetness in tastes. The lung is a female-like organ and [is related to] white in colors, autumn in seasons, the days of Geng and Xin [in the Ten Heavenly Stems], Shang in notes [of traditional Chinese music] and acridness in tastes. The kidney is a female-like organ and [is related to] black in colors, winter in seasons, the days of Ren and Gui [in the Ten Heavenly Stems], Yu in notes [of traditional Chinese music] and saltiness in tastes. These are the so-called five changes.”

44. 13 Huangdi asked, “How do [the five changes] correspond to the five Shu Acupoints?”

Waichuai:

Diagnosing the Interior by Examining the Exterior

45. 1 Huangdi said, “I have heard of the Nine Articles on the Nine Needles. I have personally put them into practice and understood the basic meaning of them. [The theory of] the Nine Needles, starting from the first [needle] to the ninth [needle], [is so profound that I] have not grasped the gist. [The theory of the Nine Needles is so abstruse that it] cannot accommodate anything [when it] becomes small and nothing can accommodate it [when it] grows large. [It is something that is] so deep that nothing can exist below it and so high that nothing can cover it. It is so subtle and abstruse that it permeates through everywhere without any limitation. I know it corresponds to the law of the heaven and earth, human affairs and the changes of the four seasons. I want to synthesize these details into one theory. Is it possible?”

45. 2 Qibo said, “What an excellent question [Your Majesty] have asked! [It is] not only necessary to establish the Dao (theory or law) for acupuncture, but also necessary for governing a country.”

45. 3 Huangdi said, “What I want to know is the Dao (theory or law) of acupuncture, not the Dao (theory or law) for ruling a country.”

45.5 黄帝说：“我想了解详细情况。”

45.7 黄帝说：“这真是个深奥难懂的问题啊！日月的光明不可遮蔽，它之所以不可遮蔽，是因为不失阴阳的道理。临床上把各种情况结合起来观察，通过切脉查验，以望诊来获知外部的征象，就像清水、明镜反映事物而不失其形一样。若人的五音不响亮，五色不鲜明，就说明五脏的功能异常，这就是内外相互影响的道理，就如同以

[When] the light of the sun and the moon [shines], the shallow of things immediately follows; [when] the water and mirror are used to examine [things], the physical shape [of things] is clearly reflected; [when] the drum is beat by a drumstick, the sound immediately follows. [This phenomenon shows that the occurrence of] a change will be immediately followed by a corresponding response [, just like that of shallow, shape and sound] . [If one has understood this basic rule, he will] grasp the gist [of the theory of acupuncture]."

45. 7 Huangdi said, "How abstruse this theory is! It is so bright that nothing can cover it up. [The reason that it cannot be] covered up is that it does not deviate from Yin and Yang [which are the law of the heaven and the earth]. [The way] to synthesize [the data collected from clinical practice to make careful] examination, to take [the pulse of the patient] to study [the changes] and to inspect [the complexion and physical build of the patient] to observe [the external manifestations] will be as clear as the mirror that reflects the shape [of things]. 46.2 少俞说：“自然界产生的风，并不是专为某人所设。风的运动对任何人都是不偏不倚的，受其侵袭的人就发病，避开其袭击的人就不会遭受危害。疾病的发生不是因为风邪有意侵袭人体，而是因为人不能预防而遭受其害的缘故。”

Chapter 46 Wubian: Five Changes

46. 1 Huangdi said, “I have heard that the occurrence of all diseases is caused by [pathogenic] wind, rain, cold and summer-heat which invade the Couli (muscular interstices) along the body hair. Sometimes [the pathogenic factors] dissipate [from the surface of the body] and sometimes remain [in the affected part]. [When remaining in the body, they may] cause wind-swelling and perspiration, or Xiaodan (emaciation)^[1], or cold-heat [disease], or Liubi^[2], or mass, or overflowing of strange Xie (Evil)^[3]. [The diseases caused are] numerous. I want to know the causes. [Sometimes people] contract diseases at the same time, but the diseases are not the same. I doubt whether the heaven has arranged different [pathogenic] wind for different people. [If this is not the case,] why there is such a difference?”

46. 2 Shaoyu said, “The heaven produces wind for people without any discrimination. The activity [of wind] is fair and just. [Those who] offend it contract [diseases while those who can] avoid [the invasion of it at the right time] will not be affected by it. [People are affected by wind and fall ill] not because [of the wind that] attacks people deliberately, but because of the people who offend it on their own.”

46. 3 Huangdi said, “[People may] encounter wind at the same time and fall ill at the same time. But the diseases are different. I’d like to know the reason.”

The hard [side] is difficult to split and the brittle [side] is easy to be cracked. [When] dealing with [the parts with] knots, even the axe can be damaged. So even in one same tree, there are hard [parts] and brittle [parts]. The hard [parts] are tough and the brittle [parts] are easy to cut, let alone the trees that are different and vary in thickness of the barks and content of juice. For the trees that blossom and sprout earlier, [when] attacked by frost and strong wind in spring, the flower will fall and the leaves will wither. Scorched by strong sunlight and encountered with severe drought, the brittle trees with thin barks will have scanty juice in the branches and therefore suffer from withered leaves. [If] blood and Qi flow adversely, the skin and muscles will dilate and blood vessels will get stagnated, [eventually] transforming into heat. Heat then scorches [fluid in] the muscles and thus causes Xiaodan (emaciation) . This is the general condition of emaciation due to bad temper. ”

46. 18 Shaoyu said, “[People with] small skeleton and weak muscles tend to suffer from cold-heat [disease]. ”

46.25 黄帝曰：“人之善病肠中积聚者，何以候之？”

46.26 少俞答曰：“皮肤薄而不泽，肉不坚而淖泽。如此，则肠胃恶，恶则邪气留止，积聚乃伤。脾胃之间，寒温不次，邪气稍至。稽积留止，大聚乃起。”

46.24 少俞答道：“要知道痹证的高下部位，必须观察各个部位的虚弱情况。”

46.25 黄帝说：“有些人容易患肠中积聚之症，应该怎样诊察呢？”

46.26 少俞答道：“皮肤薄弱而不润泽，肌肉不结实而有滑润感，出现这种现象就说明肠胃功能差。肠胃功能差则邪气停留而成积聚，积聚则损伤脾胃功能。再加上饮食寒冷失调，邪气开始逐渐侵袭脾胃，进一步蕴蓄停留，形成严重的积聚病。”

46.27 黄帝说：“关于病形的情况，我已经知道了。我想了解疾病与时令的关系。”

46. 23 Huangdi said, “Does Bi-Syndrome have a fixed upper or lower location?”

46. 24 Shaoyu said, “To understand [whether the Bi-Syndrome is located in] the upper or the lower, [the doctor has to] inspect the related regions.”

46. 25 Huangdi said, “How to diagnose [the people] susceptible to intestinal mass?”

46. 26 Shaoyu said, “Thin and lusterless skin as well as weak and soft muscles indicate that the intestines and the stomach are poor in function which will lead to retention of Xieqi (Evil-Qi). Accumulation [of pathogenic factors inside the body will] damage [Healthy-Qi in the intestines and the stomach] . [In addition,] gradual invasion of Xieqi (Evil-Qi) into the spleen and stomach due to irregular cold and warm diet [will cause] accumulation and gathering [in the intestines] and therefore lead to onset of severe abdominal mass.”

46. 27 Huangdi said, “I have understood the manifestations of disease. I’d like to know the time [when disease occurs or attacks].”

46. 28 Shaoyu answered, “[The Heavenly Stems and the Earthly Branches of] each year should be decided first in order to determine the time [when the Keqi (Gest-Qi) acts on the Zhuqi (Principal-Qi)]. [When the Keqi (Gest-Qi) dominates over the Zhuqi (Principal-Qi), known as] time of highness, [the disease becomes] alleviated; [when the Zhuqi (Principal-Qi) dominates

Sometimes though [the Zhuqi (Principal-Qi) does not dominate over the Keqi (Gest-Qi),] the disease still occurs due to the influence [of the Motion of Qi] in the year. This is what occurrence of disease due to [the relationship between] the physique [and the Motion of Qi in the year] means. The description above is also the principle of the five changes.”

Notes:

[1] Xiaodan (消瘵) is a Syndrome caused by stagnation of heat inside the body due to weakness of the Zang-Organs and fierceness of pathogenic factors. This Syndrome is often characterized by emaciation.

[2] Liubi (留痹) is a sort of Bi-Syndrome caused by retention of pathogenic wind, cold and dampness in the body due to looseness of the muscular interstices and weakness of muscles.

[3] Strange Xie (奇邪) refers to abnormal climatic changes.

[4] The regions with muscular eminence include the shoulders, elbows, hips and knees.

Chapter 47

Benzang:

The Viscera as the Foundation of Human Beings

47. 1 Huangdi asked Qibo, “The blood, Qi, Essence and Spirit in the human body are [the substances that] maintain the normal activities of life. The Channels and vessels [are the tunnels through which] blood and Qi flow to nourish the interior and exterior [parts of the body], moisten the tendons and bones as well as lubricate the joints. The Weiqi (Defensive-Qi) functions to warm the muscles, moisten the skin, fill in the Couli (muscular interstices) and control the sweat pores. The emotions and mind function to control the spirit, astringe the Hun (Ethereal Soul) and the Po (Corporeal Soul), adjust coldness and warmth and regulate emotional changes. So if the blood is harmonious, [the blood and Qi in] the Channels and vessels will flow smoothly to nourish the interior and exterior [parts of the body]. [So that] the tendons and bones will be strong and the joints will be smooth. [When] Weiqi (Defensive-Qi) is harmonious, the muscles will be comfortable and relaxed, the skin will be soft and elastic, the Couli (muscular interstices) will be compact. [When] the emotions and mind are in harmony, the spirit will be concentrated, the Hun (Ethereal Soul) and the Po (Corporeal Soul) will not disperse, anger and vexation will not take place, and the Five Zang-Organs will not be attacked by Xie (Evil). [When] coldness and warmth are well adjusted, the Six Fu-Organs [will be normal in] digesting food, Bi-Syndrome due to wind will not occur,

47.2 岐伯回答说：“这个问题很难解答！五脏与天地相应，与阴阳相合，与四时相通，与五季的五行变化相适应。五脏本身就有大小、高低、坚脆、端正及偏斜的差异；六腑也有大小、长短、厚薄、曲直、缓急的不同。这二十五种情况各不相同，有好有坏，有吉有凶，请允许我详加说明。

the Channels and the vessels will be smooth, and the joints will be normal. These are the normal states of the human body. The Five Zang-Organs store Essence, Spirit, blood, Qi, Hun (Ethereal Soul) and Po (Corporeal Soul). The Six Fu-Organs transforming food and water, and transporting body fluid. These [functions of the Five Zang-Organs and the Six Fu-Organs] are endowed from the heaven. So no matter among the wise or stupid and in the virtuous or vicious, there is no difference. However, there are some people who can enjoy a long life without contracting any disease and showing any signs of senility. Though occasionally attacked by wind, rain, sudden cold and great heat, they cannot be harmed. There are some people who live in the rooms with screens and curtains and are free from any anxiety, fear and vexation, but still cannot avoid diseases. What is the reason? I'd like to know the cause."

47. 2 Qibo answered, "What a complicated question [Your Majesty] have asked! The Five Zang-Organs correspond to the heaven and the earth, match with Yin and Yang, connect with the four seasons and adapt to [the changes of] the five seasons. The Five Zang-Organs are either small or large, hard or brittle, upright or deviated by nature. The Six Fu-Organs are either small or large, long or short, thin or thick, knotted or straight, slow or rapid by nature. 47.16 黄帝说：“我想了解一下六腑与身体其他部位的相应关系。”

47.17 岐伯回答说：“肺合于大肠，大肠外应于皮肤。心合于小肠，小肠外应于脉。肝合于胆，胆外应于筋。脾合于胃，胃外应于肉。肾合于三焦、膀胱，三焦、膀胱外应于腠理毫毛。”

47.18 黄帝说：“六腑与身体其他部位是如何相应的呢？”

47.19 岐伯说：“肺与皮肤相应。皮肤厚的，大肠也厚；皮肤薄的，大肠也薄；皮肤松弛、腹围大的，大肠松弛而长；皮肤绷紧的，大肠紧缩而短；皮肤滑润的，大肠通顺；皮肤与肌肉紧密相附的，大肠多干结滞涩。”

47. 16 Huangdi said, “I’d like to know the corresponding [relationships among] the Six Fu-Organs.”

47. 17 Qibo answered, “The lung is internally and externally related to the large intestine and the large intestine corresponds to the skin. The heart is internally and externally related to the small intestine and the small intestine corresponds to the vessels. The liver is internally and externally related to the gallbladder and the gallbladder corresponds to the tendons. The spleen is internally and externally related to the stomach and the stomach corresponds to the muscles. The kidney is internally and externally related to the Sanjiao (Triple Energizer) and the Sanjiao (Triple Energizer) corresponds to the Couli (muscular interstices) and body hair.”

47. 18 Huangdi said, “What are the corresponding [relationships between the Five Zang-Organs and the Six Fu-Organs and the related tissues]?”

47. 19 Qibo said, “The lung corresponds to the skin. [If] the skin is thick, the large intestine is also thick; [if] the skin is thin, the large intestine will be also thin. [If] the skin is flabby with large girth of the abdomen, the large intestine will be large and long. [If] the skin is tense, the large intestine will be also tense and short. 47.24 黄帝说：“脏腑的厚薄、好坏都有一定的表现。我想知道它们所发生的病变是怎样的。”

47.25 岐伯回答说：“观察外在的表现，就可知道脏腑的情况，从而了解内脏所发生的病变。”

47. 23 “The kidney corresponds to the bones. [If] the skin is compact and thick, the Sanjiao (Triple Energizer) and the bladder will be thick; [if] the skin is rough and thin, the Sanjiao (Triple Energizer) and bladder will be thin. [If] the Couli (muscular interstices) is rough, the Sanjiao (Triple Energizer) and the bladder will be relaxed. Chapter 48

Jinfu:

Inheritance of Knowledge Accumulated in History

48. 1 Leigong asked Huangdi, "I have studied medicine [from Your Majesty] and have thoroughly understood the 60 articles on the Nine Needles. I have been working diligently from morning to evening on [these articles] ever since then. Some of the ropes [that have been used to tie the wooden slips on which characters were inscribed] are broken [due to frequent reading] and some of the wooden slips [on which these articles are written] are contaminated [due to repeated reading and turning]. However, [I still] could not fully understand [the ideas expounded in these articles]. [The article entitled] Waichuai (examination of the external manifestations) says that complicated things can be synthesized into one system. I don't know what it means. [It is said that the theory about the Nine Needles] is so great that it has no exterior [aspect] and so minute that it has no interior [aspect]. It is so great and so subtle that it has no limit; it is so high and so deep that it cannot be measured. How to synthesize it then? The strength and intelligence of people are either strong or weak; the wisdom and strategy [of people] are either extraordinary or meager. [Because of such difference among people, they] cannot thoroughly understand this abstruse theory and even cannot study it so diligently as what I often do. [So] I'm afraid that [this great theory] might be lost and cannot be passed on to the later gener-

奈何？”

48.2 黄帝曰：“善乎哉问也。此先师之所禁，坐私传之也，割臂歃血之盟也，子若欲得之，何不斋乎！”

48.3 雷公再拜而起曰：“请闻命于是也。”

48.4 乃斋宿三日而请曰：“敢问今日正阳，细子愿以受盟。”

48.5 黄帝乃与俱入斋室，割臂歃血。

48.6 黄帝亲祝曰：“今日正阳，歃血传方，有敢背此言者，反受其殃。”

48.7 雷公再拜曰：“细子受之。”

48.8 黄帝乃左握其手，右授之书，曰：“慎之慎之，吾为子言之。凡刺之理，经脉为始，营其所行，知其度量，内刺五脏，外刺六

何概括它呢？”

48.2 黄帝说：“你问得很好！这正是先师再三告诫的，不能轻易传给别人，必须经过割臂歃血盟誓，才能秘密地传授。你要想得到它，为什么不至诚地斋戒呢？”

48.3 雷公再拜说：“请让我遵照你说的去做。”

48.4 于是雷公很诚恳地斋宿三天，再来请求说：“在今天正午的时候，我愿盟誓。”

48.5 黄帝和雷公一同进入斋室，举行割臂歃血的仪式。

48.6 黄帝亲自祝告说：“今天在正午的时候，通过歃血传授医道，如果谁违背了今天的誓言，必定遭受灾殃。”

48.7 雷公再拜说：“我愿接受盟戒。”

48.8 黄帝就用左手握住雷公的手，右手将书授予雷公，并且说：“谨慎啊谨慎！我现在给你讲解其中的道理。凡要掌握针刺的道理，首先要熟悉经脉，根据经脉的循行规律，掌握经脉的长短及气血情况；在内可治五脏之病，在外可治六腑之病，审察卫气的变化，作

48. 2 Huangdi said, “What a good question you have asked! [I studied] this [theory and practice] from my teacher [who maintained that it] should not be taught to others. [I will go against the instructions of my teacher to teach you this theory and practice. But I have to hold a ceremony by] cutting the arm and swearing an oath by smearing the mouth with the blood. [If] you want to study [this theory and practice], why don’t you [show your sincerity] by fasting^[1]?”

48. 3 Leigong bowed again and said, “Please allow me to do it according to Your Majesty’s instructions.”

48. 4 [So Leigong] began to fast for three days and then asked [Huangdi], “I ventured to ask [Your Majesty whether it is possible] to hold the ceremony this noon.”

48. 5 Huangdi entered the hall of ceremony with him, cutting the arm to swear by smearing the mouth with blood.

48. 6 Huangdi personally swore, “This noon I smear blood with you for teaching you the theory and practice. Violation of this oath will suffer great disaster.”

48. 7 Leigong bowed again and said, “I accept [what Your Majesty] have instructed.”

48. 8 Huangdi held Leigong’s hand with the left hand and gave him the book with the right hand, saying, “Be careful and prudent! Now I will teach you [this theory and practice] . To study the theory of needling, [you must] begin with the Channels, thoroughly understanding the running routes and the length [of the Channels as well as the amount of Qi and blood that flow in the Channels] . 48. 9 Leigong said, “I have already studied [what Your Majesty] have mentioned. [But I just] don’t know how to synthesize it. ”

48. 10 Huangdi said, “To synthesize [the theory] is just like to tie a bag. [If] the bag is not tied when it is full, [the things put into it will] spread out [of the bag] . [If] the theory is not synthesized, it cannot be superb. ”

48. 11 Leigong said, “I wish to be a beginner and tie my bag [of knowledge] before it is full. ”

48. 12 Huangdi said, “[A person who] ties [his bag of knowledge] before it is full can only be an ordinary doctor but cannot become a master [of doctors] in the world. ”

48. 13 Leigong said, “I’d like to know how to be an ordinary doctor. ”

48. 17 必须通晓经脉的运行和输注，才能进一步传授针刺治病的大法。针刺治病的大法是：脉盛的用泻法，脉虚的用补法，脉紧的可用灸法、刺法和汤药治之，脉虚陷下不起的则用灸法，脉不盛不虚的，就取病变经脉的穴位治疗。所谓经治，就是或服药，或灸刺。脉急可采用导引法，脉大而弱的，宜安心静养，不要用力太过。”

48. 17 “[As a doctor, you must] be clear about the running and infusing [rules of the Channels]. [Only by doing so can you] grasp the gist of the basic methods. [The following are] the basic methods: [If the pulse is] strong, [the disease can be treated by needling with] reducing [techniques]; [if the pulse is] weak, [the disease can be treated by] reinforcing [techniques]; [if the pulse is] tense, [it can be treated by] moxibustion, needling and decoction; [if the pulse is] depressed, [the disease can be treated by] moxibustion only; [if the pulse is] neither strong nor weak, [the disease can be treated by] Channel-Treatment [which means needling the Acupoints located on the Channel proper according to the location of disease] . The so-called Channel-Treatment [refers to] either [treatment with] decoction or needling [the Acupoints located on the Channel proper according to the location of disease]. [If the pulse is] tense, [it indicates excess of pathogenic factors and also can be treated by] directing^[2] [pathogenic factors to go out of the body]; [if the pulse is] large and weak, [the patient] should rest quietly [to nourish Yin and] avoid overstrain. ”

Notes:

[1] Fasting (齋) was a ceremony held in ancient times to show devoutness. Before holding the ceremony, people should not drink liquor and eat meat. They must take a bath and live in a separate room or a quiet place alone.

[2] The original Chinese character for “directing” is Yin (引). There are different explanations about the meaning of Yin (引) here. Some people believe that Yin (引) here refers to Daoyin (导引), a therapeutic exercise similar to Qigong (气功). Some people think that Yin (引) here refers to dredging therapy used to remove stagnation in the Channels.

五色第四十九

【原文】

49.1 雷公问于黄帝曰：“五色独决于明堂乎？小子未知其所谓也。”

49.2 黄帝曰：“明堂者，鼻也；阙者，眉间也；庭者，颜也；蕃者，颊侧也；蔽者，耳门也。其间欲方大，去之十步，皆见于外，如是者寿，必中百岁。”

49.3 雷公曰：“五官之辨奈何？”

49.4 黄帝曰：“明堂骨高以起，平以直，五脏次于中央，六腑挟其两侧，首面上于阙庭，王宫在于下极，五脏安于胸中，真色以致，病色不见，明堂润泽以清，五官恶得无辨乎？”

【今译】

49.1 雷公问黄帝说：“面部五色的变化，能单独取决于明堂吗？我不明白其中的道理。”

49.2 黄帝说：“明堂就是鼻，阙是两眉中间的部位，天庭就是额部，蕃是两颊的外侧，蔽是耳门前的部位。这些部位之间，宜端正丰隆宽大。十步以外都能看得清清楚楚，具有这种面相的人，一定寿达百岁。”

49.3 雷公说：“怎样辨别五官呢？”

49.4 黄帝说：“鼻高而隆起，平正笔直，五脏依次分布在它的中部，六腑则附于它的两侧。头面在上部的阙中和天庭，心在两目之间的下极。若五脏平和安居于胸中，正常的五色出现，而不见病色，鼻部色泽清明，由此五官就不难辨别了。”

Chapter 49 Wuse: Five Colors

49. 1 Leigong asked Huangdi, “[Do the changes of] the five colors only manifest on the Mingtang (Bright Palace) ^[1]? I’m not clear about the reason.”

49. 2 Huangdi said, “The Mingtang (Bright Palace) refers to the nose. Que refers to the region between the eyebrows, Ting refers to the forehead, Fan refers to the lateral side of the cheeks and Pie refers to the tragus. These regions should be regularly featured and broad and can be clearly seen ten steps away. [People] with such an appearance will live for one hundred years^[2].”

49. 3 Leigong said, “How to differentiate the five sensory organs?”

49. 4 Huangdi said, “The bone of the apex of the nose is high and straight. [The regions for examining] the Five Zang-Organs [are located on] the middle [of the nose while the regions for examining] the Six Fu-Organs [are located at] both sides [of the nose] . [The regions for examining] the head and face [are located in] the region between the eyebrows and the forehead. [The regions for examining] the heart [are located in] the lower regions [of the eyes] . [If] the Five Zang-Organs are situated normally in the chest, the normal colors will appear, there will be no morbid complexion and the nose will be lustrous and clear. What is the difficulty to differentiate the five sensory organs?”

Notes:

[1] In Huangdi Neijing (黄帝内经), the nose is frequently called the Bright Palace which was the place where kings in ancient China held important ceremonies or conferences.

[2] In Chinese, one hundred years just means longevity.

[3] In Chapter 5 of Suwen (素问), it says that “The left and right symbolize the routes of Yin and Yang.” Here the left and right refer to the Yin and Yang.

[4] If the kidney disease affects the heart, it indicates that the heart is already in disorder. That is why the kidney which pertains to Wood in the Wuxing (Five Elements) subjugates the heart which pertains to Fire in the Wuxing (Five Elements). In this case the black color related to the kidney will appear on the region corresponding to the heart.

Discussion on Bravery

50. 1 Huangdi asked Shaoyu, “Suppose that there are some people who walk together, stand together, are of the same age and wear the same clothes. When suddenly attacked by strong wind and storm, some of them fall ill, some of them do not fall ill or all of them fall ill. What is the reason?”

50. 2 Shaoyu said, “Which question do [Your Majesty] want to ask first?”

50. 3 Huangdi said, “I’d like to know [the explanation of] all.”

Chapter 52 Weiqi: Defensive-Qi

52. 1 Huangdi said, “The Five Zang-Organs store Jing (Essence), Shen (Spirit), Hun (Ethereal Soul) and Po (Corporeal Soul); the Six Fu-Organs receive water and food and then transport and transform them. The Qi (food nutrients) [that has been transformed from food and water] interiorly enters the Five Zang-Organs and exteriorly flows to the limbs and joints. The floating Qi that does not flow inside the Channels is Weiqi (Defensive-Qi) . The Jingqi (Essence-Qi) that flows inside the Channels is Yingqi (Nutrient-Qi) . Yin and Yang^[1] coordinate with each other. The exterior and the interior [parts of the body] are connected with each other. [These two different kinds of Qi flow inside the body like a circle without an end [and like water that] runs incessantly forwards and never stops. However [the Channels can be] divided into Yin and Yang [categories, along which there are fixed locations of] Biao (Branch), Ben (Root), Xu (Deficiency) and Shi (Excess). [Those who] can differentiate the Yin and Yang [nature of] the twelve Channels can understand where diseases usually occur. [If one can] understand where Xu (Deficiency) and Shi (Excess) [of the Channels] are located, [he will be able] to know whether the disease is located in the upper or in the lower [regions]. [If one can] understand the route^[2] [along which the Qi of the Six Fu-Organs flows], [he will be] able to know [how to solve the critical problems in treatment just like] undoing the knot of a piece of rope or opening a door.

52.5 “Please allow me to explain what is Qijie (Street of Qi): Qi in the chest flows along its Street (route), Qi in the abdomen flows along its Street (route), Qi in the head flows along its Street (route), Qi in the leg flows along its Street (route). So Qi in the head converges in the brain; Qi in the chest converges in both sides of the chest and Back-Shu Acupoints; Qi in the abdomen converges in the Back-Shu Acupoints, [the Acupoints on] the Chongmai (Thoroughfare Vessel) and the artery around the navel; Qi in the leg converges in the Qijie (ST 30), Chengshan (BL 57) and the regions above and below the malleolus. These regions should be needled with the filiform needles. [To needle these regions, the doctor] must press them first till [Qi comes] beneath the fingers and then inserts the needles. [To needle these regions can] treat headache, dizziness, syncope, abdominal pain, fullness in the chest, sudden abdominal distension and new mass problem. Pain that is mobile under pressure is easy to cure; abdominal mass without pain is difficult to cure.”

Notes:

[1] Yin and Yang here refer to Yingqi (营气 Nutrient-Qi) which pertains to Yin and Weiqi (卫气 Defensive-Qi) which pertains to Yang.

[2] The original Chinese characters for “route” are Qi (气) Jie (街 street) which refer to the route along which Qi converges and flows in the body.

[3] The Acupoint located 5 Cun above the heel is Fuyang (跗阳 BL 59).

[4] The Acupoint located between the eyes is Jingming (睛明 BL 1).

[5] Chuanglong (窗笼) refers to Tinggong (听宫 SI 19) which is located in the depression anterior to the ear.

[6] The two Channels refer to Yinwei (阴维 Yin Link-Channel) and Renmai (任脉 Conception Vessel) which converge over the Acupoint of Lianquan (廉泉 CV 23).

[7] Mingmen (命门) here refers to Jingming (睛明 BL 1).

[8] The Acupoint located 2 Cun above the middle of the fourth finger is Yemen (液门 TE 2).

[9] The Acupoint located in the upper angle posterior to the ear is Jiaosun (角孙 TE 20).

[10] The Acupoint located in the external canthus is Sizhukong (丝竹空 TE 23).

Luntong: Discussion on Pain

53. 1 Huangdi asked Shaoyu, “The tendons and bones are either strong or weak, the muscles are either hard or brittle, the skin is either thick or thin, and the Couli (muscular interstice) is either loose or tense. All [of these aspects are] different. What is the pain tolerance of these [aspects when treated by] needling and moxibustion? The intestines and the stomach vary in thickness and hardness. What is their reaction to [the stimulation of] herbs? I’d like to know the details.”

53. 2 Shaoyu said, “[People with] strong bones, flexible tendons, soft muscles and thick skin can tolerate pain. Their tolerance of pain [caused by] needling and Moxibustion is the same.”

53. 3 Huangdi said, “How [can I] know [what kind of people] tolerate pain [caused by] Moxibustion?”

53. 4 Shaoyu said, “[Those with] black skin and perfect skeleton [in addition to strong bones, flexible tendons, soft muscles and thick skin] can tolerate [pain caused by] Moxibustion.”

53. 5 Huangdi said, “How [can I] know [what kind of people] cannot tolerate pain [caused by] needling and Moxibustion?”

53. 6 Shaoyu said, “[Those with] hard muscles and thin skin cannot tolerate pain [caused by] needling and Moxibustion.”

54.1 黄帝问于岐伯曰：“愿闻人之始生，何气筑为基，何立而为楯，何失而死，何得而生？”

54.2 岐伯曰：“以母为基，以父为楯；失神者死，得神者生也。”

54.3 黄帝曰：“何者为神？”

54.4 岐伯曰：“血气已和，营卫已通，五脏已成，神气舍心，魂魄毕具，乃成为人。”

54.3 黄帝说：“什么是神呢？”

54.4 岐伯说：“当血气和调，营卫通畅，五脏形成之后，神气藏之于心，魂魄悉备，于是健全的人体就形成了。”

Chapter 54 Tiannian: Life Span

54. 1 Huangdi asked Qibo, “[When] life begins to conceive, what kind of Qi is its base]? What [kind of Qi] is its defense? What will lead to death when it is lost? And what maintains life [when it is] acquired? I’d like to know all about it.”

54. 2 Qibo said, “The base [of life] is [the Yin-blood of] the mother; the defense [of life] is [the Yang-Essence of] the father. Loss of the Shen (Spirit) [which is produced by mixture of the mother’s Yin-blood and the father’s Yang-Essence] will lead to death and preservation of the Shen (Spirit) [inside the body] will guarantee life.”

54. 3 Huangdi said, “What does Shen (Spirit) mean?”

54. 4 Qibo said, “[When] the blood and Qi [in the body are] balanced, Ying (Nutrient-Qi) and Wei (Defensive-Qi) flow smoothly, and the Five Zang-Organs have taken Shape, the Spirit [that controls the activity of life will be produced and] stored in the heart, the Hun (Ethereal Soul) and the Po (Corporeal Soul) will gradually be formed. [After all these activities have been accomplished,] the formation of the body has been completed.”

54. 5 Huangdi said, “The life span of people varies. Some die [when they are still young], some can enjoy a long life, some die suddenly, some have been ill for a long time. I’d like to know the reason.”

54.7 黄帝说：“有的人可活到百岁才死亡，如何判断一个人是否能长寿呢？”

54.8 岐伯说：“长寿的人，鼻道深邃而长，面部的骨骼高厚而方正，营卫的循行通调无阻，颜面三部隆起，肌肉丰满，骨骼高起。这种人能活到百岁后才死亡。”

54.9 黄帝说：“人的血气盛衰，从生到死这一过程，能否讲给我听呢？”

逆顺第五十五

55.3 黄帝说：“怎样察知病变的可刺与不可刺呢？”

55.4 伯高说：“《兵法》上说：‘作战时，要避开敌方迅猛的来势，不可冒然攻击敌方严整庞大的阵势’。《刺法》上说：‘热势炽盛时不可刺，大汗淋漓时不可刺，脉象纷乱模糊不清时不可刺，脉象与病情不相符的不可刺’。”

Nishun: Abnormality and Normality

55. 1 Huangdi asked Bogao, “I have heard that [the flow of] Qi is either Ni (normal) or Ni (abnormal), the pulse is either strong or weak, and there are basic rules for needling. Could you explain all these for me?”

55. 2 Bogao said, “The normal and abnormal [flow of] Qi corresponds to the heaven and the earth, Yin and Yang, the four seasons and the Wuxing (Five Elements) . The strong or weak [states of] pulse reveal the Xu (Deficiency) and Shi (Excess) as well as the superabundance and insufficiency [states of Qi and blood]. The basic rules for needling [lie in] the full awareness of [the following three aspects:] when needling can be used, when needling cannot be used [for the time being] and when needling absolutely cannot be used [because of the progress of the disease]. ”

55. 3 Huangdi said, “How to differentiate [diseases]?”

55. 4 Bogao said, “[The book entitled] Bingfa (Military Strategy) says that [one] should avoid meeting an irresistible enemy head-on and launching a frontal assault against the enemy that is strong and fully prepared. [The book entitled] Cifa (Needling Methods) says that needling should not be used [when the patient] runs a high fever, [when the patient] sweats profusely, [when] the pulse is irregular and unclear, [and when the state of] the pulse is contrary to [the condition of] the disease. ”

55. 5 Huangdi said, “How to determine the time of needling?”

【原文】

55.6 伯高曰：“上工，刺其未生者也。其次，刺其未盛者也。其次，刺其已衰者也。下工，刺其方袭者也，与其形之盛者也，与其病之与脉相逆者也。故曰：方其盛也，勿敢毁伤，刺其已衰，事必大昌。故曰：上工治未病，不治已病。此之谓也。”

【今译】

55.6 伯高说：“高明的医生，在疾病尚未发生之前进行针刺；其次，在病邪未盛时进行针刺；再次，在邪气已衰时针刺。技术低劣的医生，在邪气正盛时，或在病证危重时，或在病情与脉象不符时进行针刺。所以说，在病势正盛时不可针刺，但在邪气已衰时进行针刺，必定会收到良好的效果。所以说，高明的医生，往往是在没有发病的时候进行防治，而不是在疾病发作以后才进行治疗。说的就是这个道理。”

55. 6 Bogao said, “An excellent doctor uses needling [to treat the disease] before it occurs or uses needling [when pathogenic factors] are not exuberant or uses needling [when pathological condition] has improved. An unskillful doctor uses needling [when pathogenic factors] are exuberant or uses needling [to treat the patient who] looks strong [but actually weak] or uses needling [when] the pathological condition is contrary to the pulse state. That is why it is said that when pathogenic factors are exuberant, needling [therapy] should not be used; and that when pathogenic factors have declined, needling [therapy] should be used in time and the therapeutic effect will be significant. That is why it is said that excellent doctors take measures to prevent diseases from occurring and do not resort to treatment till the disease has already occurred. The reason is just what I have mentioned.”

56. 2 Bogao said, “The stomach is the sea of the Five Zang-Organs and the Six Fu-Organs. Food and water, [after taken into the body,] all enter the stomach. The Five Zang-Organs and the Six Fu-Organs all get Qi (nutrients of food) from the stomach. The five flavors enter the corresponding [Zang-Organs] respectively. vided into two streams [known as] Ying (Nutrient-Qi) and Wei (Defensive-Qi) [that flow inside and outside the Channels]. The Daqi (Great-Qi) [transformed from the nutrients of food] does not move but just accumulates in the chest. [That is why the chest is] called the Sea of Qi. [The Qi that accumulates in the chest] comes out of the lung and flows along the throat. That is why it runs outward [when the lung] breathes out and runs inward [when the lung] breathes in. The general rule of the Jingqi (Essence-Qi) from the heaven and the earth is triple output and single input^[1]. So [if a person] does not take food for half a day, Qi will decline; [if he] does not take food for one day, Qi will be deficient.”

56. 5 Huangdi said, “Could you explain the five flavors of the grains for me?”

56. 6 Bogao said, “Please allow me to explain in details. Among the five grains, round-grained nonglutinous rice tastes sweet, sesame tastes sour, soy bean tastes salty, wheat tastes bitter and yellow broomcorn millet tastes acrid. Among the five fruits, jujube tastes sweet, plum tastes sour, chestnut tastes salty, apricot tastes bitter and peach tastes acrid. Among the five animals, the beef tastes sweet, dog meat tastes sour, pork tastes salty, mutton tastes bitter and chicken tastes acrid. Among the five vegetables, cluster mallow tastes sweet, Chinese chive tastes sour, bean leaves taste salty, leek tastes bitter and scallion tastes acrid.”

Notes:

[1] There are different explanations about triple output and single input (三出一入) . One explanation is that the ratio between the Guqi (谷气 Food-Qi) that is breathed out and the Jingqi (精气 Essence-Qi) from the heaven and the earth that is breathed in is 3: 1. Another explanation is that the food and water taken into the body have been transformed into three kinds of substances, namely Yingqi (营气 Nutrient-Qi) and Weiqi (卫气 Defensive-Qi), Zongqi (宗气 Thoracic-Qi) and waste that all come from one source, i. e. food and water.

[2] This part is obviously redundancy due to misprinting or miscopying in history.

57.3 黄帝说：“肤胀病应如何诊断呢？”

57.4 岐伯说：“肤胀病，是由寒邪侵入皮肤之间所致，病人腹部胀大，叩击之如鼓，中空而不实，全身浮肿，皮厚，按压腹部，深陷而不起，腹部的皮色无异常变化，这就是肤胀病的证候。”

Shuizhang: Edema

57.1 Huangdi asked Qibo, “How to differentiate edema, cutaneous distension, ascites, intestinal mass, uterine mass and stony ascites?”

57.2 Qibo answered, “[When] edema begins [with the following symptoms:] slight swelling of the eyelid as if [the person] has just awoken from sleep, rapid and forceful pulse over the neck, frequent cough, cold sensation along the medial side of the thigh and swelling in the leg, abdominal ascites. [These symptoms show that] edema has occurred. To press the abdomen [of the patient, it feels] like a bag filled with water. These are the symptoms of edema.”

57.3 Huangdi said, “How to diagnose cutaneous distension?”

57.4 Qibo said, “Cutaneous distension [is caused by] invasion of cold into the skin. [When the abdomen is percussed, it sounds] rub-a-dub [like beating a drum], the abdomen is enlarged, the whole body is swelling, the skin becomes thick, the abdomen does not rebound when pressed and the color of the abdominal skin does not change. These are the symptoms of cutaneous distension.”

57.5 [Huangdi said,] “What about ascites?”

57.6 Qibo said, “The abdomen is distended and the whole body is swelling, the swelling [of the abdomen and the whole

57.7 “肠覃何如？”

57.8 岐伯曰：“寒气客于肠外，与卫气相搏，气不得荣，因有所系，癖而内着，恶气乃起，瘕肉乃生。其始生也，大如鸡卵，稍以益大，至其成如怀子之状，久者离岁，按之则坚，推之则移，月事以时下，此其候也。”

57.9 “石瘕何如？”

57.10 岐伯曰：“石瘕生于胞中，寒气客于子门，子门闭塞，气不得通，恶血当泻不泻，衃以留止，日以益大，状如怀子，月事不以时下。皆生于女子，可导而下。”

57.7 黄帝问：“肠覃病的表现是怎样的呢？”

57.8 岐伯说：“寒邪侵犯人体后，滞留在肠外，与卫气相搏，卫气不能正常运行，因此邪气留滞，积久不去附着于肠外，并日渐滋长，使形成了息肉，开始时，就像鸡蛋一样大，逐渐长大，完全形成，形如怀孕，病程长的，历经数年，按之坚硬，推之可移，月经仍按时来潮，这就是肠覃病的证候。”

57.9 黄帝说：“石瘕病的表现是怎样的呢？”

57.10 岐伯说：“石瘕病生在胞宫内，寒邪侵犯子宫颈口，使宫颈闭塞，气血凝滞不通。恶血不能排泄，便凝结成块而留滞于胞中，逐渐增大，像怀孕一样，月经不能按时来潮。石瘕病都发生在妇女，治疗时应活血化瘀，通导攻下以祛除瘀血。”

body] is just like that in cutaneous distension, but the skin is yellow and the abdominal veins are visible. These are the symptoms of ascites.”

57. 7 [Huangdi said,] “What about intestinal mass?”

57. 8 Qibo said, “[Intestinal mass is caused by] invasion of cold into the intestines that combats with Weiqi (Defensive-Qi), consequently preventing Qi from [flowing around] to nourish [the body]. [That is why pathogenic factors] linger [inside the body, giving rise to] blood stagnation inside, occurrence of morbid Qi and formation of polyp. At the initial stage, it appears like an egg. Gradually it enlarges and [the patient] looks like being pregnant. [The duration of this problem can be] as long as one year. [It appears] hard when pressed and mobile when pushed. [However,] menstruation is still regular. These are the symptoms of intestinal mass.”

57. 9 [Huangdi said,] “What about uterine mass?”

57. 10 Qibo said, “Uterine mass occurs in the uterus due to invasion of cold into the orifice of vagina that obstructs the orifice of vagina, prevents Qi from flowing normally and coagulated blood from being discharged, consequently leading to retention of coagulated blood [inside the uterus which] gradually accumulates [and makes the patient] looks like being pregnant. [Besides,] menstruation is irregular. Such a disease only occurs in women. [It can be treated by] draining [therapy to remove the coagulated blood from the uterus].”

57. 11 Huangdi said, “Can cutaneous distension and ascites be treated by needling?”

58. 2 Qibo said, “[This is due to the fact that they have already been] attacked by dampness that stays in the blood vessels and interspaces of muscles and lingers inside the body for a long time. [Or it may be caused by] traumatic injury and falling from a high place [that lead to] retention of blood stasis inside the body. 59.20 黄帝说：“人的身体有寒温的不同，是什么道理呢？”

59.21 伯高说：“膏型的人肌肉柔润，皮肤纹理粗疏的，身体多寒，皮肤纹理致密的，身体多热。脂型的人肌肉坚实，皮肤纹理致密的，身体多热，皮肤纹理粗疏的，身体多寒。”

59.22 黄帝说：“身体的肥瘦大小是如何区别的呢？”

59.23 伯高说：“膏型之人，阳气充盛，皮肤纵缓，所以腹部肥大松软而下垂。肉型之人，身体宽大。脂型之人，身形较小。”

59.24 黄帝说：“这三种人的气血情况是怎样的呢？”

60.1 黄帝曰：“余以小针为细物也，夫子乃言上合之于天，下合之于地，中合之于人，余以为过针之意矣，愿闻其故。”

60.2 岐伯曰：“何物大于天乎？夫大于针者，惟五兵者焉。五兵者，死之备也，非生之具。且夫人者，天地之镇也，其不可不参乎？夫治民者，亦唯针焉。夫针之与五兵，其孰小乎？”

60.3 黄帝曰：“病之生时，有喜怒不测，饮食不节，阴气不足，阳气有余，营气不行，乃发为痈疽。阴阳不通，两热相搏，乃化为脓，小针能取之乎？”

60.1 黄帝说：我以为小针是一种细小的东西，你却说它上合于天，下合于地，中合于人，我认为这是夸大了针的意义，想听你讲讲其中的道理。”

60.2 岐伯说：“还有什么东西能够比天更大呢？能大于针的，惟有五种兵器。但五种兵器都是在战争中用以杀人的，而不是用来治病活人的工具。人是天地之间最高贵的，故小针的作用可以和天地相参。治疗人民的疾病，小针是非常重要的。这样说来，针和五种兵器的作用，孰大孰小，不是很清楚了吗！”

60.3 黄帝说：“疾病发生之初，因喜怒无度，或饮食不节，造成阴气不足，阳气有余，致使营气郁滞不行，而发生痈疽。营卫气血阻滞不通，体内的阳热之气与邪热互相搏结，而化为脓，这样的病，小针能治疗吗？”

Chapter 60

Yuban: Jade Plate

60. 1 Huangdi said, “I think the needle is just a minute thing. But you have said that the needle corresponds to the heaven in the upper, the earth in the lower and human affairs in the middle. I feel that you have exaggerated the function of the needle. I’d like to know your explanation.”

60. 2 Qibo said, “What could be larger than the heaven? [The things that are] larger than the needle are the five kinds of weapons. But the five kinds of weapons are used to kill people, not to save people. Between the heaven and the earth, the most precious one is man. [The needle can cure diseases for man and save the life of man. Is it] not eligible to correspond to [the heaven, the earth and the human affairs]? So it is the needle that cures diseases for human beings. To compare the needle with the five kinds of weapons, it is not at all small.”

60. 3 Huangdi said, “At the initial stage of disease, [frequent emotional changes such as] sudden rejoicing and sudden rage and intemperance in eating [lead to] insufficiency of Yinqi and excess of Yangqi, [giving rise to] stagnation of Yingqi (Nutrient-Qi) and causing carbuncle. [When] Yin and Yang cannot communicate with each other, heat [caused by insufficiency of Yinqi] and heat [caused by excess of Yangqi] mix up, [steam the skin and] cause pustules. Can small needles treat such diseases?”

60.4 岐伯曰：“圣人不能使化者，为之邪不可留也。故两军相当，旗帜相望，白刃陈于中野者，此非一日之谋也。能使其民，令行禁止，士卒无白刃之难者，非一日之教也，须臾之得也。夫至使身被痈疽之病，脓血之聚者，不亦离道远乎。夫痈疽之生，脓血之成也，不从天下，不从地出，积微之所生也，故圣人自治于未有形也，愚者遭其已成也。”

60.5 黄帝曰：“其已形，不予遭，脓已成，不予见；为之奈何？”

60.6 岐伯曰：“脓已成，十死一生，故圣人弗使已成，而明为良方，著之竹帛，使能者踵而传之后世，无有终时者，为其不予遭也。”

【今译】

60.4 岐伯说：“高明的医生发现了这种病的迹象，就要及早治疗，使病邪不能久留在体内，以免久留生变。譬如两军作战，旗帜相望，刀光剑影遍于旷野，决不是一天的计谋。能够使民众令行禁止，兵士勇于冲锋陷阵，不怕牺牲，这也不是一天教育的结果，顷刻之间就能办得到的。等到身体已经患了痈疽之病，脓血已经形成，这时再想用微针治疗，那就远离了治疗规律。从痈疽的产生，到脓血的形成，既不是从天而降，也不是从地而生，而是病邪侵犯机体后，未及时去除，逐渐积聚而成的。所以聪明的人能够在痈疽没有迹象时，积极预防，不使其发生。愚笨的人，不知防治，就会遭受疾病形成后的痛苦。”

60.5 黄帝说：“如果痈疽已经形成，没有及时治疗，脓已形成，又没有觉察，又该怎么办呢？”

60.6 岐伯说：“脓已成的，十死一生，所以高明的医生能早期诊断，不等疾病形成就把它消灭在萌芽状态，并将一些好的治法，记载在竹帛上，制成专书，使有才能的人能够继承下来，使人们不再遭受痈疽的痛苦。”

60. 4 Qibo said, “Even the sages cannot dissipate [pustules that have already occurred] . [The best way to deal with it is to prevent] Xie (Evil) from lingering inside the body. [Take war for example. When] two troops are confronting each other with flags flying at both sides, and the glint and flash of daggers and swords in the battlefield, it is certainly not the plot made in one day. [In a country,] to teach the people to obey the law and the soldiers not to kill the people wantonly cannot be achieved by education overnight or a brief instruction. [If a person does not take measures to preserve health in daily life, it will inevitably] lead to occurrence of carbuncle and accumulation of purulent blood. [To resort to needling treatment then] is certainly too late. The occurrence of carbuncle and purulent blood is not caused by the heaven or the earth, but by accumulation [of pathogenic factors that have invaded the body and are not eliminated in time]. So the sages [take measures to protect themselves] before [the disease] has occurred while fools [do not know how to protect themselves and thus] always suffer from diseases. ”

60. 5 Huangdi said, “What should [the doctor] do [if he] fails to diagnose when the disease has already occurred and foresees when pus has already formed?”

60. 6 Qibo said, “[If] pus has already formed, the disease is critical. [The way that] the sages [deal with carbuncle is] to prevent it from occurring. For this reason they have developed special therapeutic methods which have been inscribed on bamboo slips and written on silk. So that people with talents can study it and pass it on to the later generations forever, and therefore protecting people from suffering it. ”

60.7 黄帝曰：“其已有脓血而后遭乎？不导之以小针治乎？”

60.9 黄帝曰：“多害者其不可全乎？”

60.10 岐伯曰：“其在逆顺焉。”

60.11 黄帝曰：“愿闻逆顺。”

60.12 岐伯曰：“以为伤者，其白眼青，黑眼小，是一逆也；内药而呕者，是二逆也；腹痛、渴甚，是三逆也；肩项中不便，是四逆也；音嘶色脱，是五逆也。除此五者为顺矣。”

【今译】

60.7 黄帝说：“已经形成脓血的，难道不能用小针来治疗吗？”

60.8 岐伯说：“用小针治疗，功效不大，用大针来治疗，又多产生不良后果，所以对于已形成脓血的，只能采用砭石，或用铍针、锋针及时排脓来治疗。”

60.9 黄帝说：“有些痈疽病多恶化，还能够治好吗？”

60.10 岐伯说：“这主要根据病证的逆顺来决定。”

60.11 黄帝说：“我想听你谈谈病证的逆顺。”

60.12 岐伯说：“白睛部显青色，黑眼小是逆证之一；服药而呕吐的，是逆证之二；腹痛而口渴甚的，是逆证之三；肩项转移不便，是逆证之四；声音嘶哑，面无血色，是逆证之五。除了这五种逆证之外，便是顺证了。”

60.13 黄帝问：“各种病都有逆顺，你可以讲给我听吗？”

60. 7 Huangdi said, “When purulent blood has already appeared and is definitely diagnosed, can small needles be used to remove it?”

60. 8 Qibo said, “To use small needles to needle the small [area] is less effective; to use big needles to needle large [area] is more harmful. So when purulent blood has appeared, only Bianshi (stone needle), Pizhen (sword-shaped needle) and Fengzhen (sharp needle) can be used to remove it.”

60. 9 Huangdi said, “[When carbuncle has become] deteriorated, can it be cured?”

60. 10 Qibo said, “This [can be predicted according to] the normal and abnormal [progress of the pathological changes].”

60. 11 Huangdi said, “I’d like to know the normal and abnormal [progress of the pathological changes].”

60. 12 Qibo said, “[When] attacked by [carbuncle, if] the white part of the eye is blue and the black part of the eye is small, this is the first abnormal [change]; [if the patient has] taken medicine and then vomited, this is the second abnormal [change]; [if the patient feels] pain in the abdomen and extremely thirsty, this is the third abnormal [change]; [if the patient feels that] the neck and nape are stiff, this is the fourth abnormal [change]; [if the patient’s] voice is hoarse and the complexion is lusterless, this is the fifth abnormal [change]. 61. 4 Qibo said, “Reducing [techniques] should not be used [when the blood and Qi are extremely deficient].”

61. 5 Huangdi said, “I have heard of five errors.”

61. 6 Qibo said, “[It emphasizes that] reducing and reinforcing [techniques should] not [be used] excessively.”

61. 7 Huangdi said, “I have heard of five contrary [phenomena in] needling.”

61. 8 Qibo said, “[If the manifestations of the disease are] contrary to [the state of] the pulse, it is called five contrary [phenomena].”

61. 9 Huangdi said, “I have heard of nine kinds of suitability in acupuncture.”

Throbbing of Channels and Infusion of Blood and Qi

62. 1 Huangdi said, “There are twelve Channels. But why only [the Lung Channel of] Hand-Taiyin, [the Kidney Channel of] Foot-Shaoyin and [the Stomach Channel of] Foot-Yangming pulsate?”

62. 2 Qibo said, “The Stomach Channel [of Foot-Yangming is closely related to the pulse]. The stomach is the sea of the Five Zang-Organs and the Six Fu-Organs. The lucid Qi [of the food nutrients transformed by the stomach] ascends to infuse into the lung. Starting from [the Lung Channel of Hand-] Taiyin, the Lung-Qi flows [along the twelve Channels], traveling forward and backward with respiration. So the pulse beats twice in one exhalation and twice in one inhalation. [A person] never stops breathing, that is why [the pulse] never stops beating.”

62. 3 Huangdi said, “[When] Qi [of the pulse] runs over the Cunkou, how does it ascend and descend and along what route does it recede and return? I don’t know all about it.”

62. 4 Qibo said, “The Qi [of pulse] leaves the Zang-Organs [and flows in the Channels] as fast as the arrow that is shot from a bow and as [forceful] as water that runs through a dam. [At the beginning the Pulse-Qi is forceful. When] reaching the thenar

62.7 黄帝曰：“足少阴何因而动？”

上达鱼际后，就呈现由盛而衰的现象，脉气虽衰散但仍逆而上行，所以运行的气势就微弱了。”

62.5 黄帝说：“足阳明胃脉为什么搏动不止呢？”

62.6 岐伯说：“这是因为胃气上注于肺，其上冲于头的慄悍之气，循咽喉而上走于空窍，循眼系，入络脑，从脑出于头面部，向下会于足少阳胆经的客主人穴，沿颊车，合于足阳明本经，并向下行于喉结两旁的人迎穴，这就是胃气别走而又合于阳明，使阳明脉搏动不休的原因。由于手太阴寸口脉和足阳明人迎脉的经气是互相贯通的，所以它的搏动是一致的。阳病而阳脉反小者为逆；阴病而阴脉反大者为逆。所以，在正常情况下，寸口和人迎脉应当协调一致，静则俱静，动则俱动，象牵引绳索一样的均匀，如一方偏盛而失去平衡，就是病态。”

62.7 黄帝说：“足少阴肾脉为什么搏动不休呢？”

62.8 岐伯说：“冲脉，为十二经脉之海，它和足少阴之络，同起于肾下，出于足阳明胃经的气街，沿大腿内侧，向下斜行入腠中，

eminence, it begins to decline. The remaining [part of the Pulse-] Qi disperses, declines and runs adversely upward. That is why it becomes weak.”

62. 5 Huangdi said, “Why [the Stomach Channel of] Foot-Yangming can pulsate?”

62. 6 Qibo said, “The Stomach-Qi infuses upward into the lung. The swift part runs upward into the head. Along the throat, it enters the upper orifices, runs around the eye system, connects with the brains, then emerges from the cheeks, moves downward to Kezhuren (GB3)^[1], circles around Yache (ST 6)^[2] and merges with [the Stomach Channel of Foot-] Yangming. Then it runs downward to Renying (ST 9). That is the way how the Stomach-Qi flows back into the Stomach. That is why the pulsation of the Yin, the Yang, the upper and the lower is the same^[3]. So if the pulse of Yang^[4] in a disease of Yang [nature] is small, it is an unfavorable sign; if the pulse of Yin^[5] in a disease of Yin [nature] is large, it is an unfavorable sign. Hence Yin and Yang^[6] are either quiet or rapid simultaneously as balanced as a piece of pulled rope. Any imbalance will lead to disease.”

62. 7 Huangdi said, “Why [the Kidney Channel of] Foot-Shaoyin pulsates?”

62. 8 Qibo said, “The Chongmai (Thoroughfare Vessel) is the sea of the twelve Channels. Together with the major Collateral of [the Kidney Channel of Foot-] Shaoyin, it starts from below the kidney, emerges from Qijie (ST 30)^[7], flows along the medial

62.10 岐伯曰：“夫四末阴阳之会者，此气之大络也；四街者，气之径路也。故络绝则径通，四末解则气从合，相输如环。”

62.9 黄帝说：“营气和卫气的运行，上下互相贯通，如环无端，现在突然遇到邪气的侵袭，或遭受严寒的刺激，外邪留居四肢，则手足懈惰无力，营卫在经脉内外运行，阴阳有度，若邪气留滞，则营卫运行的道路及转输会合之处，都会因外邪阻滞而运行失常，在这样的情况下，营卫之气是怎样往返循环的呢？”

62.10 岐伯说：“四肢末端是阴阳会合的地方，也是营卫之气循行的通路。四街是营卫之气运行的必经之路。故邪气阻塞了小的络脉后，则象四街这样的一些径路通畅，使之运行如常，当四末的邪气得以解除后，脉络又沟通，气又从这里转输会合，如环无端，运行不息。”

62. 10 Qibo said, “The four extremities are the places where Yin and Yang converge and the major routes for Qi to flow. The four Streets^[9] are the routes of Qi. So even if the Collaterals are obstructed, the routes are still clear. [8] Yin and Yang here refer to Yingqi (营气 Nutrient-Qi) and Weiqi (卫气 Defensive-Qi).

[9] The four Streets refer to the head, chest, abdomen and leg which are the places that Yingqi (营气 Nutrient-Qi) and Weiqi (卫气 Defensive-Qi) must flow through.

五味论第六十三

【原文】

63.1 黄帝问于少俞曰：“五味入于口也，各有所走，各有所病。酸走筋，多食之，令人癯；咸走血，多食之，令人渴；辛走气，多食之，令人洞心；苦走骨，多食之，令人变呕；甘走肉，多食之，令人惋心。余知其然也，不知其何由？愿闻其故。”

63.2 少俞答曰：“酸入于胃，其气涩以收，上之两焦，弗能出入也，不出即留于胃中，胃中和温，则下注膀胱，膀胱之胞薄以懦，得酸则缩卷，约而不通，水道不行，故癯。阴者，积筋之所终也，故酸入而走筋矣。”

【今译】

63.1 黄帝问少俞道：“饮食五味进入口中之后，各归入相应的脏腑经络，也各有其病的发生。酸味走筋，过食酸味，就会引起小便不通；咸味走血，过食咸味，使人口渴；辛味走气，过食辛味，使人心中空虚；苦味走骨，过食苦味，使人呕吐；甘味走肉，过食甘味，使人心中烦闷。我只知道这些情况，但不明白其中的道理，我想了解其中的道理。”

63.2 少俞回答说：“酸味入胃后，酸性收涩，只能行于上、中二焦，随气化的出入较困难，就留滞在胃中，胃中调和，功能正常，使酸味下注于膀胱，膀胱的皮薄而软，遇酸就卷曲收缩，使膀胱口也紧约束束，影响水液通行，从而形成小便不通的病证。前阴是宗筋会聚的地方，所以说酸入于胃而走筋。”

Chapter 63

Wuwei Lun: Discussion on Five Tastes

63. 1 Huangdi asked Shaoyu, “[After] the five tastes are taken into the mouth, [they] enter [the viscera that they like] respectively and cause diseases differently. The sour [taste] enters the tendons, and excessive taking of sour [food] leads to difficulty to urinate; the salty [taste] enters the blood, and excessive taking of salty [food] leads to thirst; the acrid [taste] enters Qi, and excessive taking of acrid [food] leads to heartburn; the bitter [taste] enters bones, and excessive taking of bitter [food] leads to vomiting; the sweet [taste] enters muscles, and excessive taking of sweet [food] leads to dysphoria. I know this fact but I don’t know the reason. Could you explain it for me?”

63. 2 Shaoyu said, “[When] the sour [taste] has entered the stomach, its Qi is austere and astringent. [It moves] upward to the Shangjiao (Upper Energizer) and Zhongjiao (Middle Energizer), but cannot come in and go out [along with the activity of Qi transformation]. [Since it] cannot go out, it just stays in the stomach. [If] the stomach is warm and normal [in function, it will] move downward into the bladder. The membrane of the bladder is thin and soft. When affected by sourness, it will shrink, astringing [the orifice of the bladder] and causing difficult urination. The genitals is the place where tendons converge. That is why the sour [taste] enters the tendons.”

【原文】

63.3 黄帝曰：“咸走血，多食之，令人渴，何也？”

63.4 少俞曰：“咸入于胃，其气上走中焦，注于脉，则血气走之，血与咸相得则凝，凝则胃中汁注之，注之则胃中竭，竭则咽路焦。故舌本干而善渴。血脉者，中焦之道也，故咸入而走血矣。”

63.5 黄帝曰：“辛走气，多食之，令人洞心，何也？”

63.6 少俞曰：“辛入于胃，其气走于上焦，上焦者，受气而营诸阳者也，姜韭之气熏之，营卫之气不时受之，久留心下，故洞心。辛与气俱行，故辛入而与汗俱出。”

63.7 黄帝曰：“苦走骨，多食之，令人变呕，何也？”

【今译】

63.3 黄帝说：“咸味走血分，多食咸味会使人口渴，这是什么道理呢？”

63.4 少俞说：“咸入胃后，咸味之气上走中焦，输注于血脉，与血相合，随血行走，血与咸味相合，使血液浓稠，胃中的水液就注入到浓稠的血液之中，那么胃中水液就不足，影响到咽部的津液不足，咽部和舌根即感干燥，而出现口渴。血脉是中焦所化生的精微输送到周身的道路，血也出于中焦，咸味上行于中焦，所以说咸味入胃后，走血分。”

63.5 黄帝说：“辛味走气，过食辛味会使人心中空虚，这是什么道理呢？”

63.6 少俞说：“辛味入胃后，辛味之气走上焦，上焦的功能是禀受中焦的精微之气而布散于腠理，以卫外。如果姜、韭的辛味常熏蒸于上焦，营卫之气时常受到它的影响，久留在胃中，就会使人感到心中空虚。辛味与卫气相伴而行，所以说辛味入胃后能开发腠理而与汗液一同外出。”

63.7 黄帝说：“苦味走骨，过食苦味会使人作呕，这是什么道理呢？”

63. 3 Huangdi said, “Why the salty [taste] enters the blood and excessive taking of salty [food] leads to thirst?”

63. 4 Shaoyu said, “[When] the salty [taste] has entered the stomach, its Qi flows to the Zhongjiao (Middle Energizer) and infuses into the Channels to mix up with the blood. [When] mixed up with the salty [taste], the blood will become astringent. [When becoming] astringent, [the blood gets] fluid from the stomach to enrich it. [When the fluid] in the stomach is infused [into the blood], the stomach will be deficient in fluid. [When the stomach is] deficient [in fluid], the throat will feel dry. What is why the tongue is dry and frequently feels thirsty. The blood vessels are the routes of the Zhongjiao (Middle Energizer) [to transport nutrients to the whole body] . That is why the salty [taste] enters the blood.”

63. 5 Huangdi said, “Why the acrid [taste] enters Qi and excessive taking of acrid [food] leads to heartburn?”

63. 6 Shaoyu said, “[When] the acrid [taste] has entered the stomach, its Qi moves to the Shangjiao (Upper Energizer) . The Shangjiao (Upper Energizer) receives Qi [from the Zhongjiao (Middle Energizer)] and transports it to all the Yang [phases in the whole body]. The taste of ginger and Chinese chives fumigates it, the Ying (Nutrient-Qi) and Wei (Defensive-Qi) frequently affect it and linger in the stomach. That is why there is heartburn. The acrid [taste tends to disperse and therefore] flows along with Qi. That is why [people] sweat [when they have] taken acrid [food].”

63. 7 Huangdi said, “Why the bitter [taste] enters the bones and excessive taking of bitter [food] leads to vomiting?”

【原文】

63.8 少俞曰：“苦入于胃，五谷之气，皆不能胜苦，苦入下脘，三焦之道皆闭而不通，故变呕。齿者，骨之所终也，故苦入而走骨，故人而复出，知其走骨也。”

63.9 黄帝曰：“甘走肉，多食之。令人惋心，何也？”

63.10 少俞曰：“甘入于胃，其气弱小，不能上至于上焦，而与谷留于胃中者，令人柔润者也，胃柔则缓，缓则虫动，虫动则令人惋心。其气外通于肉，故甘走肉。”

【今译】

63.8 少俞说：苦味入胃后，五谷的气味皆不能盛过苦味，苦味入下脘，三焦的通道均受到影响，闭而不通，胃气上逆而令人作呕。齿为骨之余，苦味从齿门进入，而又从齿门吐出，所以苦味走骨。”

63.9 黄帝说：“甘味走肌肉，过食甘味会使人烦闷，这是什么道理呢？”

63.10 少食说：“甘味入胃后，气味柔弱微小，不能上行至上焦，与饮食物共同停留在胃中，使胃气柔润，胃柔则气缓，气缓则虫扰动不安，虫扰动不安就会使人烦闷。甘入脾，脾主肌肉，甘味外通于肌肉。”

63. 8 Shaoyu said, “[When] the bitter [taste] has entered the stomach, it cannot be overcome by Qi of the five kinds of grains. [When] the bitter [taste] has descended to the lower part of the stomach, the passages of the Sanjiao (Triple Energizer) are all blocked. That is why there is vomiting. The teeth are the extension of the bones. That is why the bitter [taste] enters the bones after it has been taken [into the stomach]. So [when it] comes out after entering [into the body, it] indicates that it has moved into the bones.”

63. 9 Huangdi said, “Why the sweet [taste] enters the muscles and excessive taking of sweet [food] causes dysphoria?”

63. 10 Shaoyu said, “[When] the sweet [taste] has entered the stomach, its Qi is weak and soft. [So it] cannot flow to the Shangjiao (Upper Energizer), but stays in the stomach with the food, making the stomach soft. [If] the stomach is soft, [it will become] relaxed. [If the stomach becomes] relaxed, [it will lead to] disturbance of parasites. [When] disturbed by parasites, [the patient will feel] oppressed. The Qi [of sweet taste] runs externally to the muscles. That is why the sweet [taste] enters the muscles.”

64.24 手太阳之上，血气盛则多须，面多肉以平；血气皆少则面瘦恶色。手太阳之下，血气盛则掌肉充满，血气皆少则掌瘦以寒。”

64.25 黄帝曰：“二十五人者，刺之有约乎？”

64.26 岐伯曰：美眉者，足太阳之脉气血多；恶眉者，血气少；其肥而泽者，血气有余；肥而不泽者，气有余，血不足；瘦而无泽者，

64.24 循行于上部的手太阳经脉，若血气充盛，则须多而美，面部丰满，血气皆少，则面部消瘦而无华。循行于下部的手太阳经脉，若气血充盛，则掌肉丰满；气血皆少，则掌部肌肉消瘦而寒凉。”

64.25 黄帝说：“这二十五种不同类型的人，在针刺治疗时，有一定的准则吗？”

64.26 岐伯说：“眉清秀而美的，是足太阳经脉的气血充足；眉焦枯稀疏的，是气血皆少；人体肌肉丰满而润泽的，是血气有余；肥胖而不润泽的，是气有余，血不足；瘦而不润泽的，是气血皆不足。根据其形体外在表现和体内气血的有余不足，就可以知道疾病的虚实，

[If] the blood and Qi in [the Sanjiao (Triple Energizer) Channel of] Hand-Shaoyang [running along] the lower [part of the body] are superabundant, the hands are muscular and are warm; [if] both the blood and Qi are insufficient, the hands of [the person will be] emaciated or cold; [if] the Qi is insufficient and the blood is excessive, [the person will be] emaciated with visible vessels [over the body]. ”

64. 24 “ [If] the blood and Qi in [the Small Intestine Channel of] Hand-Taiyang [running along] the upper [part of the body] are superabundant, [the person will have] more moustache and beard and the face is chubby; [if] both the blood and Qi are insufficient, [the person’s] face is emaciated and lusterless. [If] the blood and Qi in [the Small Intestine Channel of] Hand-Taiyang [running along] the lower [part of the body] are superabundant, the palm and the thenar eminence are warm; [if] both the blood and Qi are insufficient, the hands of [the person will be] emaciated or cold. ”

64. 25 Huangdi said, “Are there any criteria for treating these twenty-five types of people with needling?”

64. 26 Qibo said, “Beautiful eyebrows [indicates that] Qi and the blood [in the Bladder Channel of] Foot-Taiyang are abundant; ugly eyebrows [indicates that in the Channel] the blood and Qi are insufficient; fatness with lustrous [skin color indicates that in the Channel] the blood and Qi are excessive; fatness with lusterless [skin color indicates that in the Channel] the Qi is excessive but the blood is insufficient; thinness with lusterless [skin color indicates that in the Channel] both the Qi and the blood are insufficient. 64.27 黄帝曰：“刺其诸阴阳奈何？”

64.28 岐伯曰：“按其寸口人迎，以调阴阳，切循其经络之凝涩，结而不通者，此于身皆为痛痹，甚则不行，故凝涩。凝涩者，致气以温之，血和乃止。其结络者，脉结血不和，决之乃行，故曰：气有余于上者，导而下之；气不足于上者，推而休之；其稽留不至者，因而迎之。必明于经隧，乃能持之。寒与热争者，导而行之；其宛陈

64.27 黄帝说：“怎样针刺三阴三阳经所出现的病变呢？”

64.28 岐伯说：“切按人迎、寸口脉，以审察阴阳盛衰的变化，再循按其经脉所行之处，有无气血凝涩不通的现象，气血凝涩不通的，都为痛痹。严重的，气血不能通行，故出现气血凝涩不通的现象。气血出现了凝涩，应当用针补气，使阳气运行至该部，以温通凝涩的经脉，待气血通调后停止治疗。若有小的络脉出现气血的结聚，而血行不通的，可刺出瘀血，开通脉络，气血就可正常运行。所以凡上部病气有余的，应该采取上病下取的取穴方法，以引导病气下行；凡上部正气不足的，用推而扬之的针法，促使正气上行；气迟迟不至的，或气至迟滞，中途滞留的，当于其迟留之处用针速刺之，以接引其气，使其运行至病所。必须明确经脉的循行，才能正确采用各种不同的针刺法。如有寒热交争的现象，应根据其阴阳盛衰的不同情况，引导其气血运行；脉中虽有郁滞而血尚未瘀结的，应根据不同情况予以不同治疗。必须先熟悉二十五种人的外部不同特征，经脉上下气血

64. 27 Huangdi said, “How [to treat the disorders of] the Yin and the Yang [Channels with] needling?”

64. 28 Qibo said, “Pressing [the pulses over the regions of] Cunkou and Renying (ST 9) can reveal the conditions of Yin and Yang. Pressing along the Channels and Collaterals [can reveal whether there are signs of] obstruction and unsmoothness. [If there is obstruction in the Channels and Collaterals, it will cause] pain all over the body. [If the obstruction is] serious, [the patient] even cannot walk. [These symptoms and signs show that there are] obstruction and unsmoothness [in the Channels and Collaterals]. [To treat] obstruction and unsmoothness, needling therapy can be used] to induce Qi (Yangqi) to warm [the Channels and Collaterals]. [Such a treatment can be used] till the blood is harmonized. [If there is] stagnation in the Collaterals, blood cannot flow smoothly. [Only when blood stasis is] drained [can the blood] flow smoothly. That is why it is said that excessive Qi (pathogenic factor) in the upper [part of the body can be treated by] directing it to move downward [with needling]; insufficiency of Qi (Healthy-Qi) in the lower [part of the body can be treated by] propelling it to move upward [with needling]; stagnation or delayed arrival [of Qi can be treated by] guiding it [with the needling]. Only when [the running routes of] the Channels are made clear can [one] understand [how to treat disease with needling therapy]. [When pathogenic] cold and heat are struggling, [it can be adjusted by] guiding it to flow [with needling therapy and proper techniques]. [If there is] stagnated blood [which has] not coagulated [in the Channels, it can be] regulated with proper methods. [In a word, when the internal and external characteristics of] the twenty-five types of people are made clear,

[the states of] the blood and Qi as well as the features of the left, the right, the upper and the lower [parts of the body] are distinguished, [the principles and methods of] needling [will be naturally] understood.”

Notes:

[1] The six directions refer to the east, west, south, north, the upper position and the lower position. In ancient times people used the expression of “six directions” to refer to the universe.

[2] “Five” here refers to Wuxing (五行 Five Elements).

[3] The Yin and Yang types of people can be further divided into five categories, namely Taiyang (太阳), Shaoyang (少阳), Taiyin (太阴), Shaoyin (少阴) and Yinyang (阴阳).

[4] Jiao (角) is one of the five musical notes in ancient China and pertains to Wood in Wuxing (五行 Five Elements). Jiao (角) is divided into five categories, namely Shangjiao (上角 Upper Jiao), Dajiao (大角 Great Jiao), Zuojiao (左角 Left Jiao), Dijiao (钦角 Right Jiao) and Panjiao (判角 Below the Great Jiao). Such a comparison between Wuxing (五行 Five Elements) and Wuyin (五音 five musical notes) shows that each element among Wuxing (五行 Five Elements) is as changeable as the musical notes.

[5] Cangdi (苍帝 Black Emperor) is one of the five legendary Emperors in ancient China. In the book entitled Zhouli (周礼 Rituals) compiled in the Zhou Dynasty (周朝 about 1100BC to 256 BC), it says, “Among the five Emperors, the one in the east is called Qingdi (青帝 Blue Emperor), (or Cangdi in some editions), the one in the south is Chidi (赤帝 Red Emperor), the one in the central region is Huangdi (黄帝 Yellow Emperor), the one in the west is Baidi (白帝 White Emperor) and the one in the north is Heidi (黑帝 Black Emperor).

[6] Zhizhi (质徵) was written as Dazhi (大徵) or Taizhi (太徵) in other editions.

[7] Zhipan (质判) was written as Zhizhi (质徵) in some editions.
